Smart Pet Feeder Model: MC-W01-V INPUT: DC5.0V-1A  
FCC ID: 2BN4IMC-W01-V

CAUTION: This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Precautions for Wireless WiFi Connection

1. Supports dual band dual-mode (2.4GHz/5GHz) wireless network. Please ensure that your phone is connected to the wireless network (2.4GHz/5GHz) before connecting to the device.
2. It is recommended to use a combination of numbers and letters within 12 characters for WiFi names and passwords, and avoid using special symbols.
3. It is recommended that the distance between the router and the device be within 10 meters, which can improve the success rate of network distribution and keep away from devices with strong magnetic interference.
4. If the network allocation fails, please shut down the device and restart it, or reset the device (long press the reset button for 6 seconds) until the device indicator light flashes, and then allocate the network again.
