

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the internal components of an EUT. At the top is a white plastic housing. Below it is a black printed circuit board (PCB) populated with various electronic components, including a microcontroller, capacitors, and connectors. A yellow ribbon cable is visible. The components are laid out on a blue textured surface next to a black ruler with white markings in millimeters and centimeters.
Solder Board-Component View 1	 A photograph showing the underside of the PCB from the previous view. It displays the solder joints and components on the reverse side of the board. The board is placed on the same blue textured surface next to the same black ruler for scale.

Solder Board-Component View 6	 A photograph showing a black rectangular component, likely a battery or capacitor, mounted on a blue textured surface. A white label on the component contains technical specifications and the 'GAPSC' logo. A white wire is connected to the left side of the component. A black ruler with white markings is positioned vertically to the left of the component, showing measurements in millimeters.
Antenna View	 A photograph showing a long, thin black printed circuit board (PCB) with various electronic components, including a large integrated circuit and several smaller components. The PCB is placed on a blue textured surface. A black ruler with white markings is positioned vertically to the left of the PCB, showing measurements in millimeters. A red rectangular box highlights a specific area on the right side of the PCB, and a red line points from this box to a label 'BT Ant' located below the image. BT Ant
