

The reasons for not putting FCC/IC TA info on the product label

<p>23.2mm X 18.6mm X 16.2mm</p> 	<ul style="list-style-type: none"> - Models OTE150R/OTE150L are very small and curved. - Due to the surface treatment of OTE150R/OTE150L, it is more complex to do printing and due to this the scrap will increase significantly and make it unreasonable expensive to print on the headset - FCC ID/IC ID will be included in the printed user manual and on the outer surface of the product box, - Marking on top surface would ruin the product design in a way so that the product would not be attractive to customers
<p>Meet the app</p>  <p>Jabra Sport Life</p> <p>Customize earbud settings Manage your workouts with real-time coaching Test and analyze your fitness level</p> <p>Available on the App Store Get it on Google play</p>	<p>OTE150R/OTE150L will use accompanying app (Jabra Sport life app) with cell phone (evidence as attached below). E labeling will be extended to devices with a cell phone screen, which can display the regulatory info (such as the FCC /IC identification number, TELEC mark and ID, safety warnings etc.). The use of electronic labelling rather than permanent physical labels reduces costs for manufacturers as well.</p>

The following pages shows the way through the App menu (About -> Technical info -> Regulatory information).

This guidance will be added to the online documentation for Elite 2 /Elite 3.
