

Recoton Corporation  
2950 Lake Emma Rd  
Lake Mary, Fl 32714  
May 28,2002

Kenneth Nichols, Chief, Laboratory Division  
Office of Engineering and Technology  
Federal Communications Commission  
Columbia, MD 21046

Dear Mr. Nichols:

Reference: CLV-AW9T

Pursuant to Section 0.459 and 0.457(d)(ii), we are requesting that certain portions of this application be withheld from public inspection for 2 years. The materials to which this request applies have been separated physically and marked "CONFIDENTIAL, NOT FOR PUBLIC INSPECTION". These materials consist of: Schematics, Theory of operation, Block diagrams, and internal Photographs. They contain trade secrets which are proprietary, and for which patent protection has yet to be secured. Disclosure of these materials would do substantial harm to Recoton's future business, and would deprive the public of a source of very low noise wireless audio devices. This material is not available to the public, and has been disclosed to third parties only pursuant to non-disclosure agreements of the type usually used in our industry. Protection for 2 years is requested until a patent application can be filed and processed.

Please contact Jorgen Andersen, Chief Engineer at 407 833 1582 if there are any questions regarding this request.

Regards,

/s/Jorgen Andersen, Chief Engineer
