

ZN-S02 Instructions for use

1. Product layout:

The bottom of back panel

The bottom of front panel

Type-C External
Power Port

horn

Packing List:

Front Panel

Back Panel

Buckle Box

Strike Plate

Lock Body

M6×50 screw * 2

Lock Body Mounting
Screws * 4

Panel and lock body installation:

1. Use the hole adaptor to make door holes according to the size instruction. Adjust center distance to 60mm or 70mm (factory setting is 60mm).

2. Insert the lock body into the hole of door and tighten lock body with screws.

3. Install the mounting studs to the front panel corresponding to the screw hole (as the picture shows). Put the main cable down through the lock body, make the panel close to the door surface.

4. Fix back plate and back panel onto the door, and tighten it with screw M6×50.

5. Insert the data cable onto the socket which is on the back panel.

6. According to your actual door open direction to adjust the switch direction. R means right open and L means left open.

7. Fix the back panel onto the back plate, and tighten it with screws M4×40 and M4×12(factory screwed to the panel)

8. Check whether the switch is normal or not, if not, back to step 6.

9. Install the battery and battery cover. Check all electronic functions and verify the mechanical key to unlock. If all functions are normal, you can register an account and use your smart lock.

Installation Note:

When knob dot corresponds to the letter, the reversing switch on the circuit board also need to toggle to the corresponding letter.
 Right-opening door: points to "R"
 Left-opening door: points to "L"

The main line interface

二. Product Features(According to actual model)

- Open Way: Fingerprint, Password, IC card, Key, Bluetooth, and etc. Bring new experience to open the door.
- Fingerprint: Advanced semiconductor sensors, 360 degrees identification angle, finger sensor size 10*108, 508 dpi resolution, FRR (fingerprint rejection rate) < 0.0001%, FAR (fingerprint accept rate) < 0.03%.
- Password: Fashioned touch technology, Allow to put 1-12 digit numbers before and after true password.
- Capacity: fingerprint 100pcs, password 100pcs, card 100pcs (Total 250pcs mixed freely).
- Membership management: The Administrator have the highest right to lock setting (normal member allows to lock and unlock only).
- Alarm function: Low power alarm, Fake passwords alarm, Anti-pry alarm.
- External power supply: Please use power source or other equipment which is 5V to recharge for emergency when low power (Replace new battery once door is open).

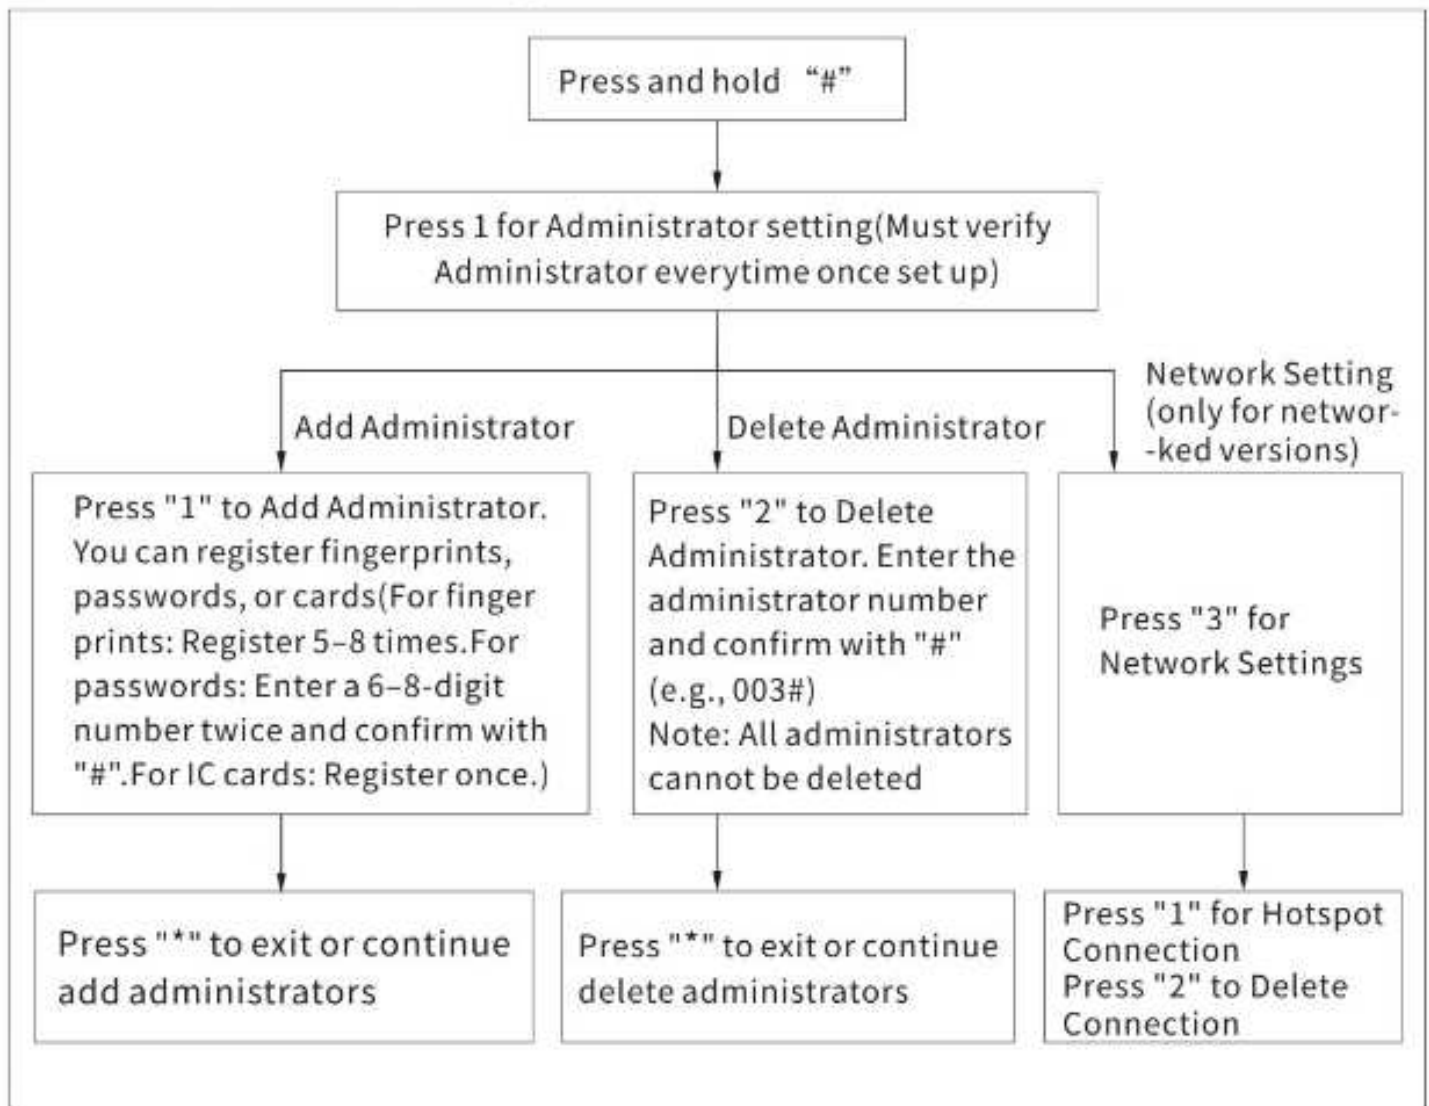

三. Remark

1. Please reset factory default and clear all member records immediately after lock installed.
2. Please use different and more angle when input fingerprint, Do attention to do with no hard.
3. We suggest to change battery at least in 6 months, in order to avoid smart lock damage because of exhausted battery.
4. The lock use 4*AA battery, When first time alarms "low battery, please replace battery", it can be open around 50 times more; But please replace immediately in order to avoid any inconvenience.
5. By continuous 5 times wrong input with fingerprint/password/card, lock will alarm, and locked for 90 seconds.

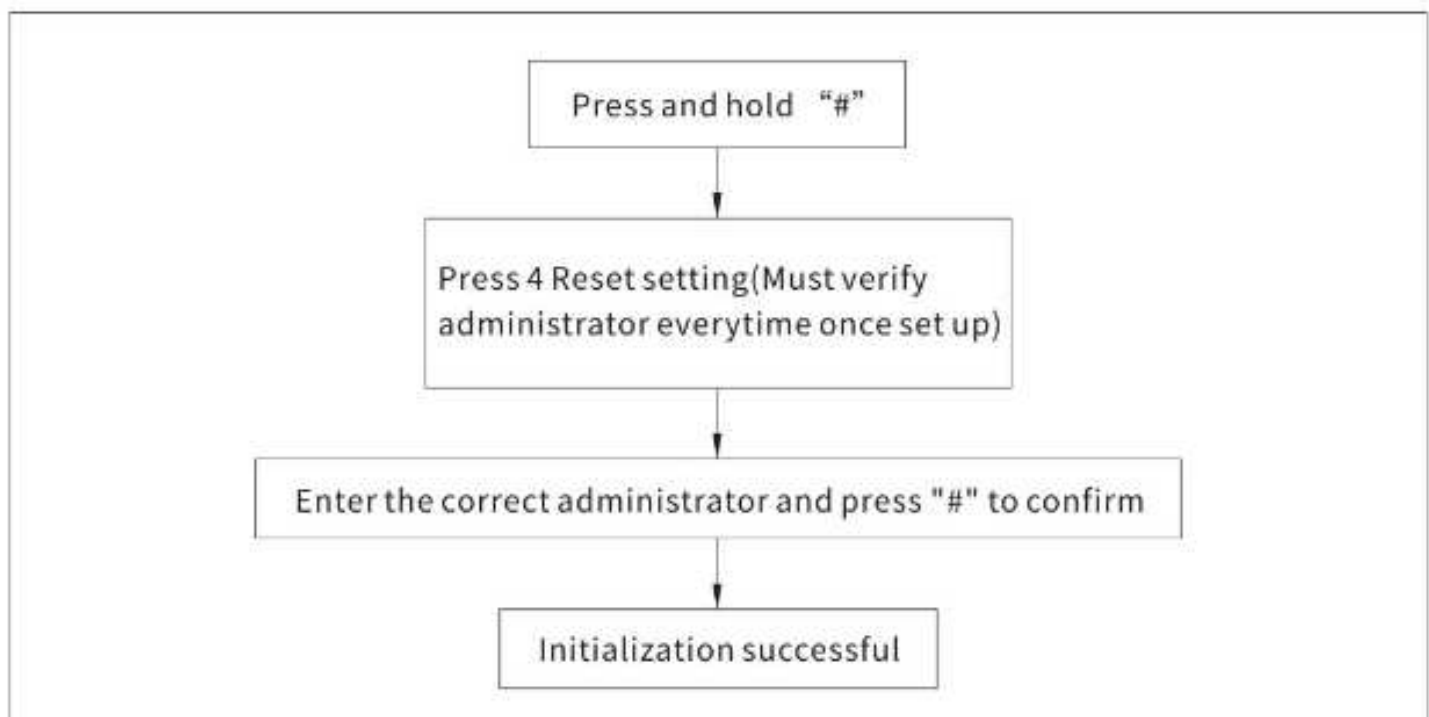

四. Guide:

Initialization Procedure: Remove the battery cover, press and hold RESET button for 6 seconds, voice guide "Initialization operation successful"

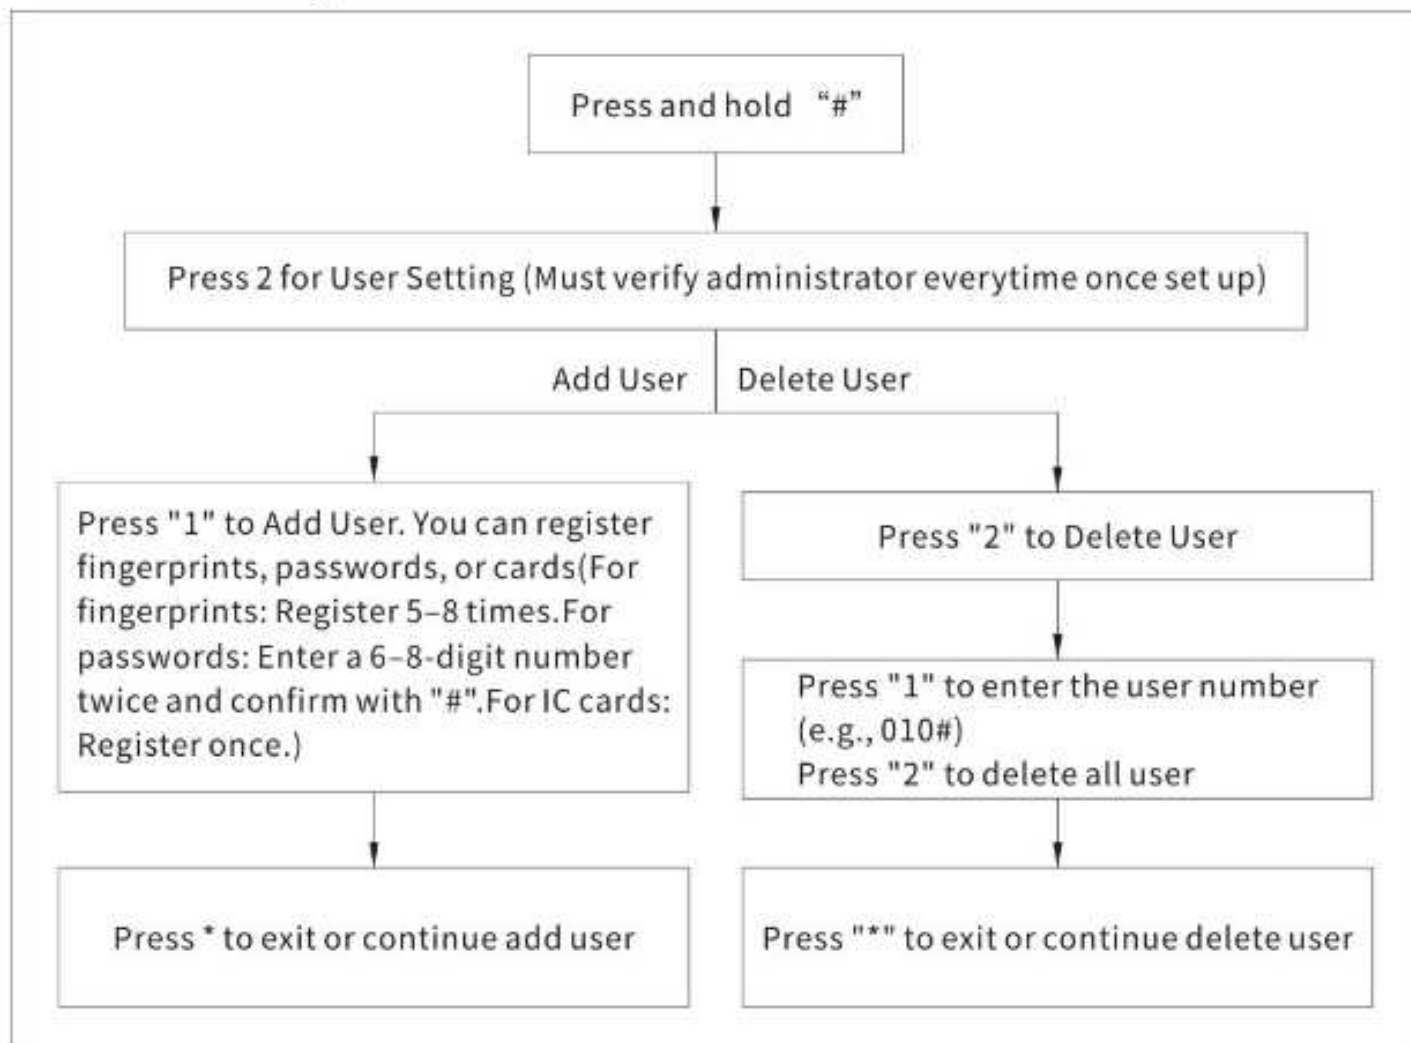

● Administrator setting:

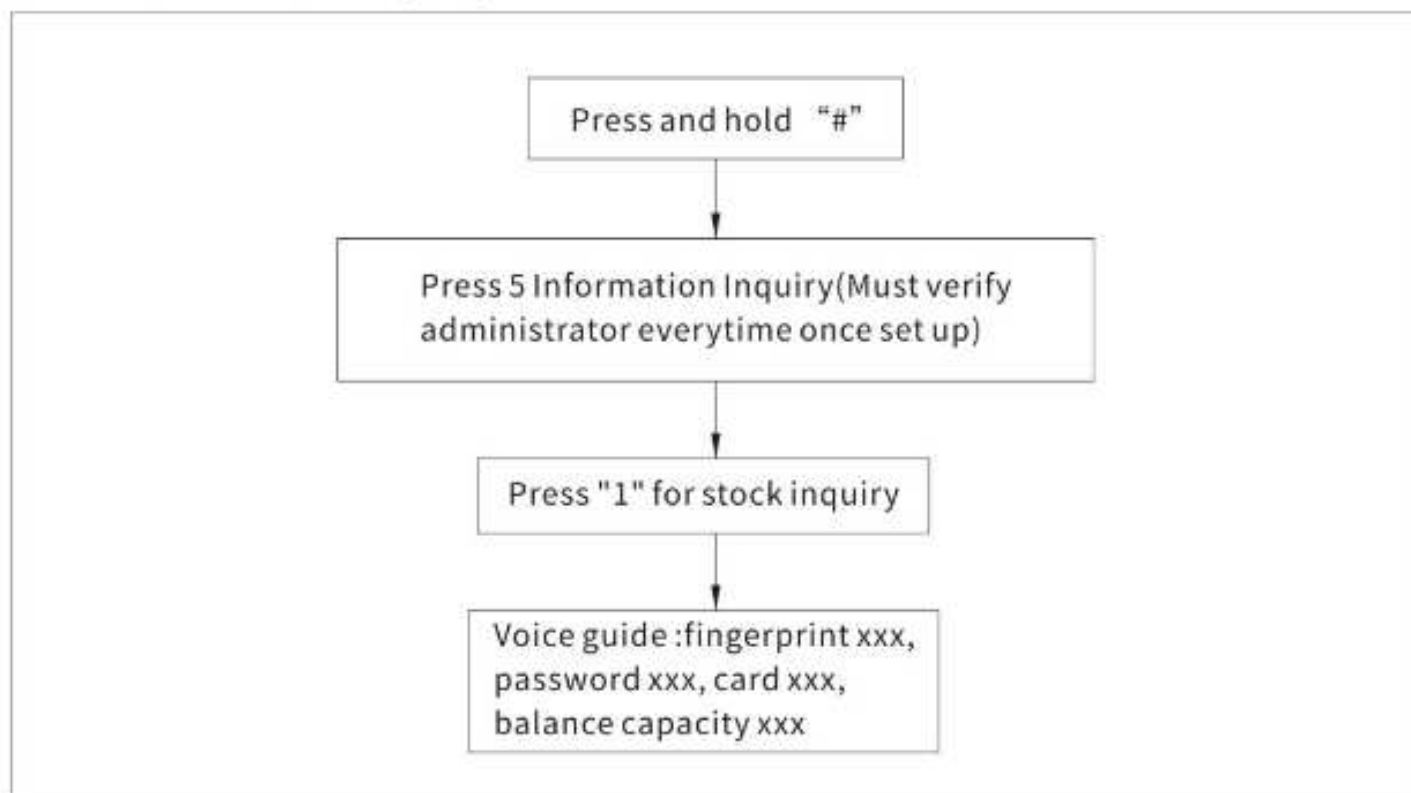

● Reset setting:

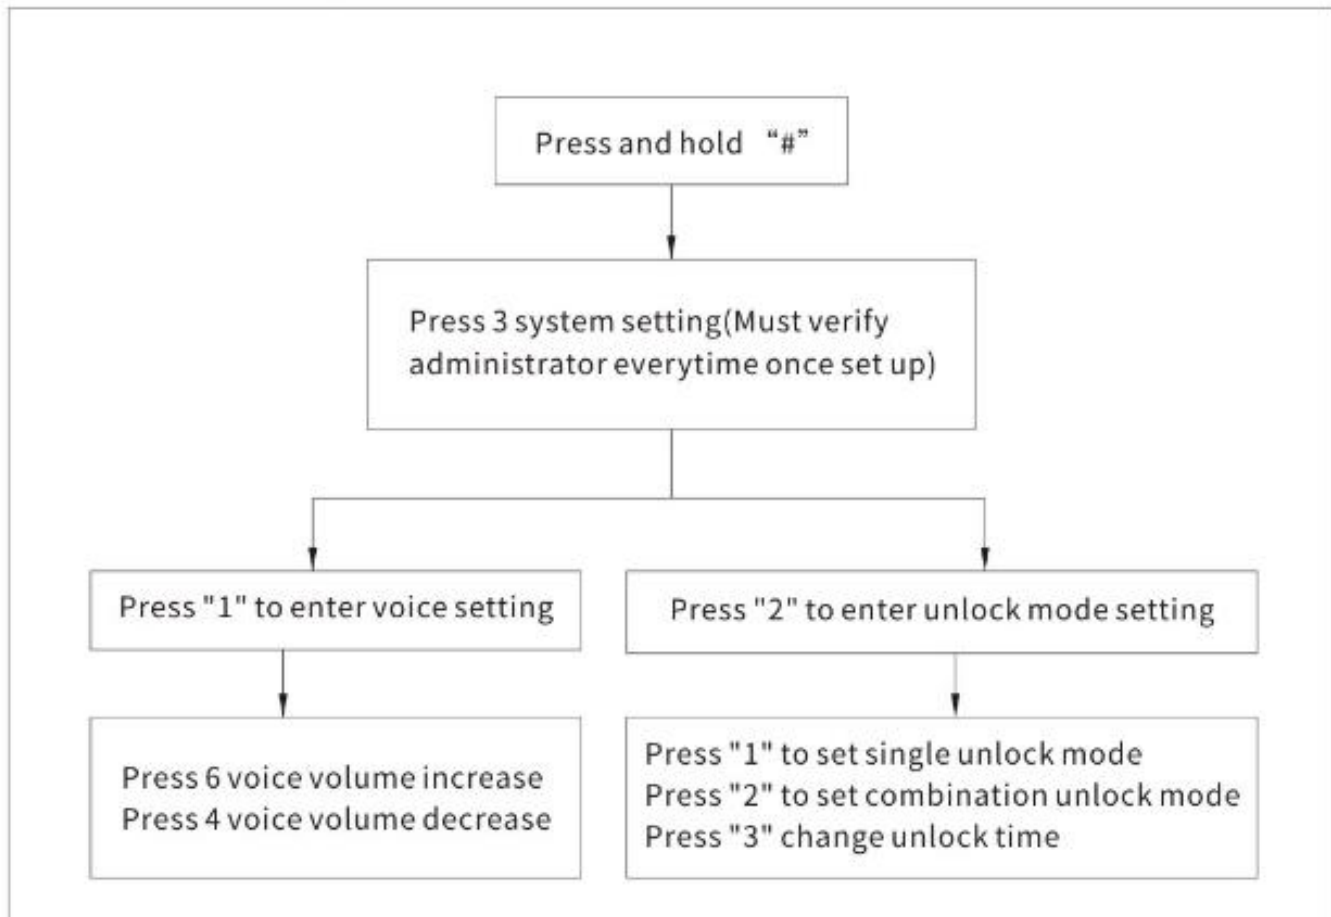

● User Setting:

● Information Inquiry:

● System Setting:

5. Bluetooth connecting(two ways):

Click "+" on the upper right corner in APP

Manual addition method:

- ① Click "Camera/lock" category on the left
- ② Search "Door Lock (Bluetooth)"
- ③ Start Bluetooth network connection.
- ④ In 3rd page, waiting for device connecting.

Automatic search method:

- ① Select device search page
- ② Search the lock automatically in the page of APP
- ③ Click on the link, and waiting for device connection

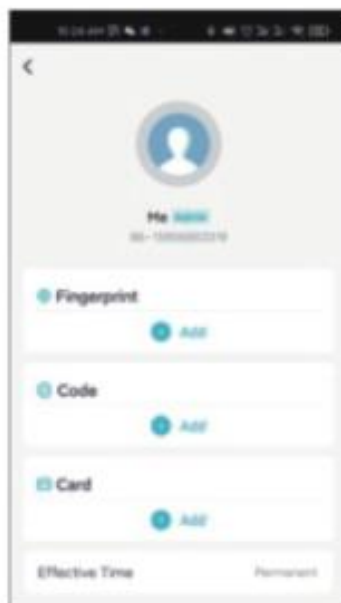

6. Bluetooth: In App page, slide right to unlock, slide left to lock
7. Fingerprint: Click membership administration in APP, scan fingerprint according to tips, then you may use scanned fingerprint to open.
8. Password: Click membership administration in APP, input password, then you may use input password to open.
9. IC card: Click membership administration in APP, scan IC card, then you may use IC card to open.
10. Automatic lock: On App page, slide down to setting with auto-lock on/off. The door will be automatically closed in 6 seconds when auto-lock function is on.
11. Volume: In APP page, slide down to set volume with mute, low, normal and high.
12. Lock Button: Lock button on inner panel. Only master user is allow to open the door when lock button function is on. Push down to turn off lock function.

V . App download

App page

App registration : please register new account or use sms password to enter APP. If you do not have an account, Click "new account" to register, following steps, to get sms, and new password setting. Or go ahead to enter APP directly with exist account. Login way includes password, verifying password by sms, social account.

FCC Caution:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement.
