T2 PRO Guide

**Support@dekalastore.com**

If you need any assistance please feel free to contact us

#### ❏ Add Your T2 Pro :

- Start the App: Open the Find My™ app on your supported iPhone or iPad and enable notifications. As the T2 PRO only works with Apple's Find My app.

##### - Connect T2 Pro:

- 1. Enable Bluetooth:** Turn on Bluetooth so the Find My app can detect the T2 PRO.
- 2. Power On:** Press the T2 PRO button to power it on; you'll hear a sound.
- 3. Enter Pairing Mode:** Press the button again to enter pairing mode, confirmed by another sound, making it discoverable in the Find My app.

4. Select the "Items" tab, then tap "Add Item," and next tap "Other Supported Items."

5. Once T2 Pro is detected, tap "Connect."

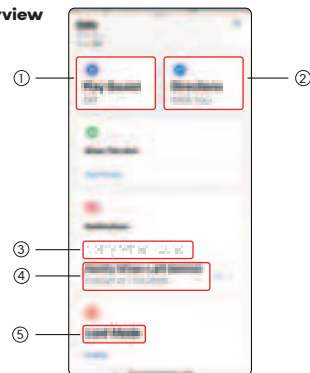

6. Choose a recognizable name and emoji for your T2 Pro and tap "Continue."

7. Find My™ will ask for confirmation to add T2 Pro to your Apple ID; tap "Continue."
8. Tap "Finish." Your T2 Pro is now set up and ready to be connected to whatever item you wish to locate, such as your keys.

## Overview

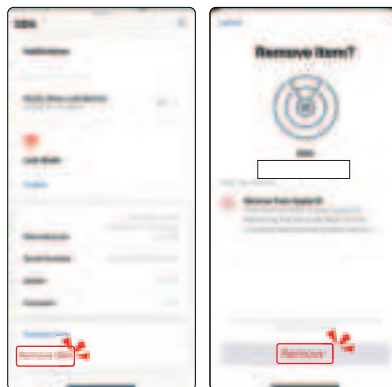

- ① **Play Sound:** When T2 Pro is nearby, Tap "Play Sound" to make T2 Pro emit a beep. Once found, tap "Stop Sound" to stop the beeping.
- ② **Directions:** Navigate to the last known location by tapping "Directions" to open the Apple Maps app.
- ③ **Notify When Found:** Enable "Notify When Found" to receive notifications when another Find My network device locates T2Pro.
- ④ **Notify When Left Behind:** Enable "Notify When Left Behind". If T2Pro is no longer with you after 4 minutes, you will receive a notification, informing you that it is no longer with you.
- ⑤ **Lost Mode:** Enable "Lost Mode" to display a message with your contact information on the lock screen of the lost device, allowing others to contact you.  
**Note:** When "Lost Mode" is enabled, "Notify When Found" will be automatically activated.  
 When "Lost Mode" is enabled, your T2Pro will be locked and cannot be used with a new iPhone or iPad.

## ❖ 2 ways of Resetting T2 Pro

### Way 1: Reset on Find My

1. Open the Find My™ app and select the "Items" tab.
2. Tap on your T2 Pro from the list.
3. Ensure "Lost Mode" is disabled.
4. Scroll to the bottom of the screen and tap "Remove Item."
5. A summary will open; then tap "Remove" to confirm. Press the T2 Pro button briefly; it can now be connected to other Apple phones.

### Way 2: Factory Reset:

Press and hold for 10 seconds. After hearing a beep at 3 seconds, continue holding for another 7 seconds until a series of tones indicates a factory reset. After each reset, press the button briefly to re-enter pairing mode.

### **Operating Instructions**

1. **Power On:** After turning off, press the button once, accompanied by a series of startup tones, then press again to hear a beeping sound, indicating pairing mode. (For first-time connection, a short press is enough to enter pairing mode.)
2. **Power Off:** Press and hold the button for at least 3 seconds, release within 1 second after hearing a beep, then listen for another beep to confirm shutdown.
3. **Pairing Mode Timeout:** If not paired with a phone within 3 minutes after entering pairing mode, it will stop pairing. Press the button briefly to hear a beeping sound and re-enter pairing mode.

### **Precautions for Binding and Unbinding:**

If the tracker is near the phone and the Find My app does not detect the tracker after 15 seconds:

- \* Remove and reinstall the battery of the tracker or replace it with a new one; after hearing a tone, press the button to enter pairing mode.
- \* Follow the factory reset steps again for T2 Pro.

#### **Other Notes:**

- \* The speed of binding and unbinding in the Find My™ app can vary due to network speed, phone performance, and tracker signal strength.
- \* Changing the battery does not affect the normal operation of the tracker.
- \* If the tracker continuously beeps or is silent after installing the battery, it may indicate the battery is depleted. Replace with a new battery. If there is no startup tone after battery replacement, the tracker may be damaged.

### Replace The Battery

1. Pry open the shell from the side notch of the product.

2. Remove the old CR2032 battery.

3. Insert the new CR2032 battery with the positive side facing up (text side up).

4. Close the shell, replacement is complete.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE: The manufacturer is not responsible for any radio or TV interference caused by unauthorized modifications or changes to this equipment. Such modifications or changes not expressly approved by the party responsible for compliance could void the user's authority to operate this device. The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction. Federal Communication Commission (FCC) Radiation Exposure Statement: Power is so low that no RF exposure calculation is needed. This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is

encouraged to try to correct the interference by one or more of the following measures: Reorient or relocate the receiving antenna. Increase the separation between the equipment and receiver. Connect the equipment into a n outlet on a circuit different from that to which the receiver is connected. Consult the dealer or an experienced radio/TV technician for help. The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
