Request for Permissive Change

We, **AXIS Communications AB**, hereby request a permissive change pursuant to CFR § 2.1043 as follows.

Original application granted on **02/22/2024** for FCC ID: **PNB-LB1ZM**

Reason:

Our end-device is a portable device, but the existing FCC Grant for PNB-LB1ZM only allows for fixed and mobile applications. In addition, co-location of another transmitter is not included in the original FCC Grant for PNB-LB1ZM and in our application, this will be the case. So, we would need to add portable applications to the existing FCC Grant, state a separation distance less than 20 cm from all persons and allow for the module will be integrated into host co-located and operating in conjunction with a second transmitter and antenna.

No changes have been made to the RF module's hardware or firmware.

Testing of RF radiation exposure, including the case with a co-located transmitter, has been made for the end-device to demonstrate that the device complies with the limits for portable devices in CFR § 2.1093.

Test report is attached to this application.

A handwritten signature in blue ink, appearing to read "Klas Granbom", written over a horizontal line.
