

# **RF Exposure Report**

Report No.: SA140812C13E

FCC ID: PY314100252

Test Model: C7100V-100NAS

Received Date: Mar. 18, 2016

Test Date: May 13, 2016

Issued Date: June 20, 2016

Applicant: NETGEAR INC

Address: 350 East Plumeria Drive, San Jose CA 96134, USA

Issued By: Bureau Veritas Consumer Products Services (H.K.) Ltd., Taoyuan Branch

Hsin Chu Laboratory

Lab Address: E-2, No.1, Li Hsin 1st Road, Hsinchu Science Park, Hsinchu City 300,

Taiwan R.O.C.

This report is for your exclusive use. Any copying or replication of this report to or for any other person or entity, or use of our name or trademark, is permitted only with our prior written permission. This report sets forth our findings solely with respect to the test samples identified herein. The results set forth in this report are not indicative or representative of the quality or characteristics of the lot from which a test sample was taken or any similar or identical product unless specifically and expressly noted. Our report includes all of the tests requested by you and the results thereof based upon the information that you provided to us. You have 60 days from date of issuance of this report to notify us of any material error or omission caused by our negligence, provided, however, that such notice shall be in writing and shall specifically address the issue you wish to raise. A failure to raise such issue within the prescribed time shall constitute your unqualified acceptance of the completeness of this report, the tests conducted and the correctness of the report contents. Unless specific mention, the uncertainty of measurement has been explicitly taken into account to declare the compliance or non-compliance to the specification. The report must not be used by the client to claim product certification, approval, or endorsement by any government agencies.

Report No.: SA140812C13 Reference No.: 160527C03

### 1 Certificate of Conformity

**Product:** Wireless Cable Data Gateway

**Brand: NETGEAR** 

Test Model: C7100V-100NAS

Sample Status: ENGINEERING SAMPLE

Applicant: NETGEAR INC

**Test Date:** May 13, 2016

Standards: FCC Part 2 (Section 2.1091)

KDB 447498 D01 General RF Exposure Guidance v06

IEEE C95.1-1992

The above equipment has been tested by **Bureau Veritas Consumer Products Services (H.K.) Ltd., Taoyuan Branch**, and found compliance with the requirement of the above standards. The test record, data evaluation & Equipment Under Test (EUT) configurations represented herein are true and accurate accounts of the measurements of the sample's EMC characteristics under the conditions specified in this report.

### 2 RF Exposure

## 2.1 Limits For Maximum Permissible Exposure (MPE)

| Frequency Range<br>(MHz) | Electric Field<br>Strength (V/m)                      | Magnetic Field<br>Strength (A/m) | Power Density<br>(mW/cm <sup>2</sup> ) | Average Time (minutes) |  |  |  |
|--------------------------|-------------------------------------------------------|----------------------------------|----------------------------------------|------------------------|--|--|--|
|                          | Limits For General Population / Uncontrolled Exposure |                                  |                                        |                        |  |  |  |
| 300-1500 F/1500          |                                                       |                                  |                                        |                        |  |  |  |
| 1500-100,000             |                                                       |                                  | 1.0                                    | 30                     |  |  |  |

F = Frequency in MHz

### 2.2 MPE Calculation Formula

 $Pd = (Pout*G) / (4*pi*r^2)$ 

where

Pd = power density in mW/cm<sup>2</sup>

Pout = output power to antenna in mW

G = gain of antenna in linear scale

Pi = 3.1416

R = distance between observation point and center of the radiator in cm

#### 2.3 Classification

The antenna of this product, under normal use condition, is at least 25cm away from the body of the user. So, this device is classified as **Mobile Device**.

Report No.: SA140812C13 Reference No.: 160527C03 Page No. 5 / 7

Report Format Version: 6.1.1

## 2.4 Antenna Gain

The antennas provided to the EUT, please refer to the following table:

| THE and | 2.4GHz antennas provided to the EOT, please refer to the following table: |                                       |                                 |              |                |  |  |
|---------|---------------------------------------------------------------------------|---------------------------------------|---------------------------------|--------------|----------------|--|--|
| No.     | Transmitter<br>Circuit                                                    | Gain (dBi)<br>(Include cable<br>loss) | Frequency range (GHz to GHz)    | Antenna Type | Connecter Type |  |  |
| 1       | 0                                                                         | 2.07                                  | 2.4~2.4835                      | PIFA         | i-pex(MHF)     |  |  |
| 2       | 1                                                                         | 2.07                                  | 2.4~2.4835                      | PIFA         | i-pex(MHF)     |  |  |
| 3       | 2                                                                         | 2.07                                  | 2.4~2.4835                      | PIFA         | i-pex(MHF)     |  |  |
|         |                                                                           |                                       | 5GHz antenna                    |              |                |  |  |
| No.     | Transmitter<br>Circuit                                                    | Gain (dBi)<br>(Include cable<br>loss) | Frequency range<br>(GHz to GHz) | Antenna Type | Connecter Type |  |  |
|         |                                                                           | 3.33                                  | 5.15~5.25                       | PIFA         | i-pex(MHF)     |  |  |
| 4       | 0                                                                         | 3.32                                  | 5.25~5.35                       | PIFA         | i-pex(MHF)     |  |  |
| 4       |                                                                           | 3.29                                  | 5.47~5.725                      | PIFA         | i-pex(MHF)     |  |  |
|         |                                                                           | 3.28                                  | 5.725~5.850                     | PIFA         | i-pex(MHF)     |  |  |
|         | 1                                                                         | 3.33                                  | 5.15~5.25                       | PIFA         | i-pex(MHF)     |  |  |
| -       |                                                                           | 3.32                                  | 5.25~5.35                       | PIFA         | i-pex(MHF)     |  |  |
| 5       |                                                                           | 3.29                                  | 5.47~5.725                      | PIFA         | i-pex(MHF)     |  |  |
|         |                                                                           | 3.28                                  | 5.725~5.850                     | PIFA         | i-pex(MHF)     |  |  |
|         | 2                                                                         | 3.33                                  | 5.15~5.25                       | PIFA         | i-pex(MHF)     |  |  |
| _       |                                                                           | 3.32                                  | 5.25~5.35                       | PIFA         | i-pex(MHF)     |  |  |
| 6       |                                                                           | 3.29                                  | 5.47~5.725                      | PIFA         | i-pex(MHF)     |  |  |
|         |                                                                           | 3.28                                  | 5.725~5.850                     | PIFA         | i-pex(MHF)     |  |  |

#### 3 Calculation Result Of Maximum Conducted Power

| Frequency<br>Band<br>(MHz) | Max Power (mW) | Antenna Gain<br>(dBi) | Distance<br>(cm) | Power Density<br>(mW/cm²) | Limit<br>(mW/cm²) |
|----------------------------|----------------|-----------------------|------------------|---------------------------|-------------------|
| 2412-2462                  | 713.576        | 6.84                  | 25               | 0.43888                   | 1                 |
| 5180-5240                  | 607.881        | 8.10                  | 25               | 0.49972                   | 1                 |
| 5260-5320                  | 185.197        | 8.09                  | 25               | 0.15189                   | 1                 |
| 5500-5720                  | 242.814        | 8.06                  | 25               | 0.19778                   | 1                 |
| 5745-5825                  | 606.638        | 8.05                  | 25               | 0.49299                   | 1                 |

NOTE:

2.4GHz: Directional gain = 2.07dBi + 10log(3) = 6.84dBi

5GHz:

UNII-1: Directional gain = 3.33dBi + 10log(3) = 8.10dBi U-NII-2A: Directional gain = 3.32dBi + 10log(3) = 8.09dBi U-NII-2C: Directional gain = 3.29dBi + 10log(3) = 8.06dBi UNII-3: Directional gain = 3.28dBi + 10log(3) = 8.05dBi

#### **Conclusion:**

The formula of calculated the MPE is:

CPD1 / LPD1 + CPD2 / LPD2 + .....etc. < 1

CPD = Calculation power density

LPD = Limit of power density

WLAN 2.4GHz + WLAN 5GHz = 0.43888 / 1 + 0.49972 / 1 = 0.939

Therefore the maximum calculations of above situations are less than the "1" limit.

--- END ---
