7435 Oakland Mills Road
Columbia, MD 21046

To Whom It May Concern:

The test lab of record contacted CKC Certification Services sending notification of updated test report. During a recent internal review process it was determined that a correction factor used during AC conducted emissions testing (15.207) was incorrectly applied. The updated report(s) issued correct the data in question and demonstrate continued compliance with applicable limits.

While the report issue date is updated consistent with revision history, the original testing dates remain unchanged.

Should you have any questions or require clarification, please feel free to contact us.

Thank you,

Steve Behm
Director, CKC Certification Services, LLC.
