Operations using equipment designed to operate with a 12.5 kHz channel bandwidth will be authorized a 11.25 kHz bandwidth. Emission Mask D—12.5 kHz channel bandwidth equipment. For transmitters designed to operate with a 12.5 kHz channel bandwidth, any emission must be attenuated below the power (P) of the highest emission contained within the authorized bandwidth as follows: (1) On any frequency from the center of the authorized bandwidth f_0 to 5.625 kHz removed from f_0: Zero dB. (2) On any frequency removed from the center of the authorized bandwidth by a displacement frequency (f_d in kHz) of more than 5.625 kHz but no more than 12.5 kHz: At least $7.27(f_d - 2.88 \text{ kHz})$ dB. (3) On any frequency removed from the center of the authorized bandwidth by a displacement frequency (f_d in kHz) of more than 12.5 kHz: At least $50 + 10 \log (P)$ dB or 70 dB, whichever is the lesser attenuation.		
Test setup		
EUT Spectrum Analyzer Rubidium Reference		
Test procedure		
- EUT set to transmit mode - Center frequency set to test channel center frequency and the highest emission is determined - Resolution bandwidth is set to 100 Hz and detector to peak and max hold. - As for the authorized bandwidth the 99% power bandwidth is measured.

1 on is the instant when a 1 kHz test signal is completely suppressed, including any capture time due to phasing.			
t1 is the time period immediately following t on.			
t2 is the time period immediately following t1.			
t3 is the time period from the instant when the transmitter is turned off until t off.			
t off is the instant when the 1 kHz test signal starts to rise.			
2 During the time from the end of t2 to the beginning of t3, the frequency difference must not exceed the limits specified in §90.213.			
3 Difference between the actual transmitter frequency and the assigned transmitter frequency.			
4 If the transmitter carrier output power rating is 6 watts or less, the frequency difference during this time period may exceed the maximum frequency difference for this time period.
