Hello Chris,

Yes, you are right. I confirm that this transmitter will not transmit when charging in the cradle.

Regards,
Gema.

Gema, since this application is tied to the Transceiver (MT#16229 FCCID: DZL201657A) and that has a question about the Conducted Emissions, this application will be held until that issue is resolved. Additionally, please confirm that this transmitter will not transmit when charging in the cradle (as implied in the block diagram).

Best regards,

Chris Harvey
