| <p><b>Conducted Emission<br/>Test Setup</b></p>               |  A photograph showing a conducted emission test setup. On the left, a spectrum analyzer is placed on a white lab bench. A power line with a red emergency stop button is visible on the wall. On the floor, a power supply unit is connected to the system. To the right, a wooden table holds a small white camera or sensor. A yellow and black striped safety barrier is in the background. |
| <p><b>Radiation Emission Test<br/>Setup (Below 30MHz)</b></p> |  A photograph of a radiation emission test chamber. The interior walls are lined with white, square-shaped electromagnetic interference (EMI) absorbers. A metal frame stands in the center, supporting a test fixture. The floor is metallic and has yellow and black striped safety markings.                                                                                               |

**Radiation Emission Test  
Setup (30MHz to 1GHz)**

**Radiation Emission Test  
Setup (1GHz to 18GHz)**

**Radiation Emission Test  
Setup (Above 18GHz)**
