Roland:

Sorry for the oversight and thanks for bringing it up.

Please see the attached for label location information that I used in previous applications for connectorized and integral version each. The photo/drawing is correct only for the label location. The contents of the label will not be the same as what we submitted in a separate file.

Caroline

Caroline:

Review of this application has begun but is not complete. So far, we note the following:

ADMINISTRATIVE

- there appears to be no indication of FCC label location on the connectorized B60. An FCC label appears on the external photo of the integral antenna model. You may wish to overdraw a label location callout on the appropriate external photo of the connectorized B60, or other means of indicating label location, and re-submit the external photo PDF file. A new photo is not necessary.

Regards,
Roland
