POWER / STANDBY MODE

To place the vibrating c-ring into standby mode, press and hold the power button on the c-ring for 3 seconds. The LED will light up and stay solid. You may now use the vibration buttons on the c-ring or the remote. To turn off standby mode, press and hold the power button on the c-ring for 3 seconds.

VIBRATION

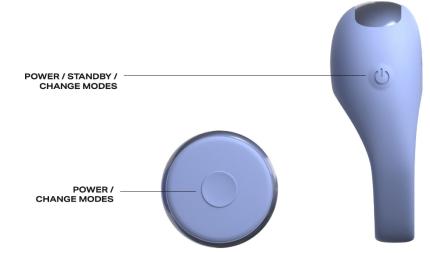

Once in standby mode - Press the vibration button on the c-ring or remote to turn on the vibrating motor. The LED on the c-ring will light up, the motor will start, and the LED will turn off after 2 seconds. Each press of the button will cycle through the ten modes of vibration and the LED will change in sync with each mode and then turn off after 2 seconds. Press and hold the button on the c-ring or remote for three seconds to turn off.

POWER OFF

To stop all functionality, press and hold the power button on the c-ring or remote for 3 seconds. Please note, standby mode can only be turned off via the power button on the c-ring. Caution - To prevent the battery from draining, always turn off standby mode after use (by pressing and holding the power button on the c-ring for 3 seconds. The LED will be off in standby mode).

FUNCTIONS

FEATURES 10 FUNCTION VIBRATIONS 3 SYNCED CONSTANT SPEEDS + 7 PATTERNS

FCC Warning

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE 1: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- -Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- -Consult the dealer or an experienced radio/TV technician for help.

NOTE 2: Any changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
