

# RF EXPOSURE **EVALUATION REPORT**

Shanghai SenseRobot Intelligent **APPLICANT** 

Technology Co., Ltd.

SenseRobot Go Professional/ PRODUCT NAME

SenseRobot Chess

RC3G-I, RC3G-P, RC3G-M, RC3G-E, : RC3G-N, RG2W-I, RG2W-P, RG2W-M,

RG2W-E. RG2W-N

: SenseRobot **BRAND NAME** 

**MODEL NAME** 

**FCC ID** : 2BLUE-RC3G-I

: 47 CFR Part 2(2.1091) STANDARD(S)

RECEIPT DATE 2024-10-18

**TEST DATE** 2024-11-01 to 2024-11-12

**ISSUE DATE** 2025-03-11

Edited by:

Su Xiaoxian (Rapporteur)

Su Xiaoxian

Approved by:

Shen Junsheng (Supervisor)

NOTE: This document is issued by Shenzhen Morlab Communications Technology Co., Ltd., the test report shall not be reproduced except in full without prior written permission of the company. The test results apply only to the particular sample(s) tested and to the specific tests carried out which is available on request for validation and information confirmed at our website.

### 1. Technical Information

Note: Provide by applicant.

### 1.1 Applicant and Manufacturer Information

Applicant:	Shanghai SenseRobot Intelligent Technology Co., Ltd.		
Applicant Address:	Unit 6-77, 6th Floor, No. 1900 Hongmei Road, Xuhui District,		
Applicant Address.	Shanghai, China		
Manufacturer:	Shanghai SenseRobot Intelligent Technology Co., Ltd.		
Manager days and days are	Unit 6-77, 6th Floor, No. 1900 Hongmei Road, Xuhui District,		
Manufacturer Address:	Shanghai, China		

### 1.2 Equipment under Test (EUT) Description

Product Name:	SenseRobot Go I	eRobot Go Professional/ SenseRobot Chess		
Sample No.:	2#,3#,4#			
Hardware Version:	V1			
Software Version:	V1.0.6 R3			
	WLAN 2.4GHz	2412MHz-2462MHz		
Frequency Bands:	WLAN 5GHz	5180MHz-5240MHz		
		5745MHz-5825MHz		
Modulation Mode	WLAN 2.4GHz	DSSS, OFDM		
Modulation Mode:	WLAN 5GHz	AN 5GHz OFDM		
Antenna Type:	Dipole Antenna			
Antenna Gain:	WLAN 2.4GHz	4.2dBi		
Antenna Galli.	WLAN 5GHz	6.3dBi		

**Note 1:** According to the certificate holder, they declared that the product name: SenseRobot Chess/ SenseRobot Go Professional, with model name: RC3G-I, RC3G-P, RC3G-M, RC3G-E, RC3G-N, RG2W-I, RG2W-P, RG2W-M, RG2W-E, RG2W-N, they have the following differences:

		<u> </u>
Product name	HVIN	Model name
SenseRobot Go Professional/	RG2W-I	RG2W-I, RG2W-P, RG2W-M, RG2W-E, RG2W-N
SenseRobot Chess	RC3G-I	RC3G-I, RC3G-P, RC3G-M, RC3G-E, RC3G-N

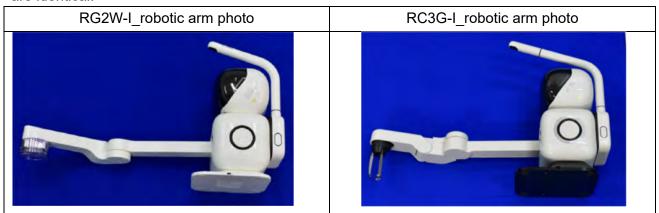

The difference between the two products is only the robotic arm and the software.

The 5 models name of the two products are the same product. These five models only different in model name and color. Their electrical circuit design, layout, components used and internal wiring

are identical.

The main measuring model is RC3G-I, only the results for RC3G-I were recorded in this report.

### 1.3 Applied Reference Documents

### Leading reference documents for testing:

Identity	Document Title	Method Determination /Remark
47 CFR Part 2(2.1091)	Radio Frequency Radiation Exposure Assessment: mobile devices	No deviation
KDB 447498 D01v06	General RF Exposure Guidance	No deviation

**Note 1:** Additions to, deviation, or exclusions from the method shall be judged in the "method determination" column of add, deviate or exclude from the specific method shall be explained in the "Remark" of the above table.

**Note 2:** When the test result is a critical value, we will use the measurement uncertainty give the judgment result based on the 95% confidence intervals.

### 2. Device Category and RF Exposure Limit

Per user manual, Based on 47 CFR 2.1091, this device belongs to mobile device category with General Population/Uncontrolled exposure.

#### **Mobile Devices:**

47 CFR 2.1091(b)

For purposes of this section, a mobile device is defined as a transmitting device designed to be used in other than fixed locations and to generally be used in such a way that a separation distance of at least 20 centimeters is normally maintained between the transmitter's radiating structure(s) and the body of the user or nearby persons. In this context, the term "fixed location" means that the device is physically secured at one location and is not able to be easily moved to another location. Transmitting devices designed to be used by consumers or workers that can be easily re-located. such as wireless devices associated with a personal computer, are considered to be mobile devices if they meet the 20 centimeter separation requirement.

#### **General Population/Uncontrolled Exposure:**

The general population/uncontrolled exposure limits are applicable to situations in which the general public may be exposed or in which persons who are exposed as a consequence of their employment may not be made fully aware of the potential for exposure or cannot exercise control over their exposure. Members of the general public would come under this category when exposure is not employment-related; for example, in the case of a wireless transmitter that exposes persons in its vicinity. Warning labels placed on low-power consumer devices such as cellular telephones are not considered sufficient to allow the device to be considered under the occupational/controlled category, and the general population/uncontrolled exposure limits apply to these devices.

**Table 1 Limits for Maximum Permissible Exposure (MPE)** 

Frequency range (MHz)	Electric field strength (V/m) B) Limits for Genera	Magnetic field strength (A/m)	Power density (mW/cm²)	Averaging time (minutes)
0.3-1.34	614	1.63	*(100)	30
			` '	
1.34-30	824/f	2.19/f	*(180/f <sup>2</sup> )	30
30-300	27.5	0.073	0.2	30
300-1500	-	-	f/1500	30
1500-100,000	-	-	1.0	30

f = frequency in MHz\* = Plane-wave equivalent power density

# 3. Maximum Average Power Summary

Wireless Mode	Channel	Frequency (MHz)	Max. Average Power (dBm)	Tune-up Limit (dBm)
WLAN 2.4GHz	CH 1	2412	19.27	19.50
WLAN 5GHz	CH 149	5745	19.01	19.50

**Note 1:** According to KDB 447498, MPE assessment is based on source-based time-averaged maximum conducted output power of the RF channel requiring assessment, adjusted for tune-up tolerance, and the minimum test separation distance required for the exposure conditions.

Note 2: The maximum average power refers to report (Report No.: SZ24100167W01/W02).

### 4. RF Exposure Assessment

#### > Standalone Transmission Assessment:

Bands	Frequency (MHz)	Tune-up Power(dBm)	Antenna Gain(dBi)	E.I.R.P. (mW)	Power Density (mW/cm²)	Limit for MPE (mW/cm²)
WLAN 2.4GHz	2412	19.50	4.2	234.42	0.047	1.0
WLAN 5GHz	5745	19.50	6.3	380.19	0.076	1.0

#### Note:

- According to KDB 447498, MPE assessment is based on source-based time-averaged maximum conducted output power of the RF channel requiring assessment, adjusted for tune-up tolerance, and the minimum test separation distance required for the exposure conditions.
- 2. MPE calculate method

### $S = PG/4\pi R^2$

Where: S= Power density (in appropriate units, e.g. mW/cm<sup>2</sup>)

P = Time-average maximum tune-up power (in appropriate units, e.g. dBm)

G = numeric gain of the antenna (in appropriate units, e.g. dBi)

R = Separation distance to the centre of radiation of the antenna (20cm)

### > Simultaneous Transmission Assessment:

This device only incorporates a WLAN transmitter, therefore simultaneous transmission evaluation is not required.

#### > Conclusion:

According to 47 CFR §2.1091, this device complies with human exposure basic restrictions.

# **Annex A Testing Laboratory Information**

### 1. Identification of the Responsible Testing Laboratory

Laboratory Name:	Shenzhen Morlab Communications Technology Co., Ltd.		
	FL.3, Building A, FeiYang Science Park, No.8 LongChang		
Laboratory Address:	Road, Block 67, BaoAn District, ShenZhen, GuangDong		
	Province, P. R. China		
Telephone:	+86 755 36698555		
Facsimile:	+86 755 36698525		

### 2. Identification of the Responsible Testing Location

Name: Shenzhen Morlab Communications Technology Co., Ltd.		
	FL.3, Building A, FeiYang Science Park, No.8 LongChang	
Address:	Road, Block 67, BaoAn District, ShenZhen, GuangDong	
	Province, P. R. China	

#### 3. Facilities and Accreditations

All measurement facilities used to collect the measurement data are located at FL.3, Building A, FeiYang Science Park, Block 67, BaoAn District, Shenzhen, 518101 P. R. China. The test site is constructed in conformance with the requirements of ANSI C63.10-2013 and CISPR Publication 22; the FCC designation number is CN1192, the test firm registration number is 226174.
