## OPERATION INSTRUCTIONS

Detection Range: 180°

NOTE:

1. The PIR sensor shall always be tilted slightly downward.
2. The orientation angle of the sensor shall be between 5-45°.

RECOMMENDED INSTALLATION HEIGHT: 6.5-13.1 feet above the ground.

When mounted 8ft above the ground and the sensor is 5° down, the maximum sensing distance is about 72ft.

When mounted 8ft above the ground and the sensor is 45° down, the minimum sensing distance is about 19ft.

Note: The detection distance of the sensor is the farthest when the ambient temperature is 25 °C. Any temperature fluctuations above or below 25 °C will affect the detection distance. If the light continues to detect motion while it is on, it will remain on until the motion stops.

The motion sensor is more sensitive to horizontal movement than vertical movement.
