

Response to E04-000103-1

1. The test report has been revised on page 29.
2. The frequency tolerance on the 731 form should be 0.12358 ppm.
3. The test report has been revised on pages 6 and 7.
4. A revised confidentiality letter has been uploaded.
5. The customer does not want to keep the block diagram confidential.
6. The test plan for this EUT indicates the lowest frequency used in this device is 8 MHz. Per 2.1057 that is all that is required.
