Marine VHF Radio

Radio VHF maritime

**OWNER'S MANUAL
GUIDE D'UTILISATION**

MAKING A DISTRESS CALL

For future reference, write your boat's name & call sign here:

Speak slowly - clearly - calmly.

1. Make sure your radio is on.
2. Press the **16/9-TRI** button to switch to Channel 16 (156.8 MHz).
(If the display does not show 16, press the **16/9-TRI** button again until it does.)
3. Press the **Push to Talk** button and say: "**MAYDAY -- MAYDAY -- MAYDAY.**"
4. Say "**THIS IS** {name of your boat (three times) and call sign/boat registration number (once)}."
5. Repeat "**MAYDAY** {name of your boat}" once.
6. Tell where you are: (what navigational aids or landmarks are near, or read the latitude and longitude from your GPS).
7. State the nature of your distress (e.g. sinking, medical emergency, man overboard, on fire, adrift, etc.).
8. State the type of assistance you need (medical, towing, pumps, etc.).
9. Give the number of persons aboard and describe the condition of any injured persons.
10. Estimate present seaworthiness of your ship (e.g. how immediate is the danger due to flooding or fire).
11. Briefly describe your ship, giving ship name (i.e., "Blue Duck is 32 foot cabin cruiser, white hull, blue deck house").
12. Say: "**I WILL BE LISTENING ON CHANNEL 16.**"
13. End the message by saying "**THIS IS** {name or call sign of your boat}, **OVER.**"
14. Release the **Push to Talk** button and listen.

If you do not get an answer after 30 seconds, repeat your call beginning at step 3 above.

FAIRE UN APPEL DE DÉTRESSE

Pour toute référence ultérieure, transcrivez ci-dessous le nom et l'indicatif d'appel de votre bateau:

Parlez lentement – clairement – calmement.

1. Vérifiez si votre radio est en marche.
2. Appuyez sur la touche **16/9-TRI** du microphone afin de commuter au canal 16 (156,8 MHz). (Si le canal 16 n'apparaît pas à l'affichage, appuyez de nouveau sur la touche **16/9-TRI** jusqu'à ce qu'il soit affiché.)
3. Appuyez sur le bouton de microphone **Push to Talk** et dites: "**MAYDAY -- MAYDAY -- MAYDAY**".
4. Donnez l'identité de votre navire en disant : "**ICI {nom de votre bateau (trois fois) ou indicatif d'appel et le numéro d'identification de votre bateau (une fois)}**".
5. Dites "**MAYDAY {nom ou indicatif d'appel de votre bateau} une fois**".
6. Donnez votre position : (quels sont les points de repère ou aides à la navigation près de vous ou lisez les coordonnées de longitude et de latitude apparaissant sur votre dispositif GPS).
7. Révélez la nature de votre détresse (par exemple, nous sommes en train de couler, urgence médicale, un homme à la mer, un incendie, nous sommes à la dérive, etc.
8. Révélez la nature de l'aide désirée (médicale, remorquage, essence, etc.)
9. Donnez le nombre de personnes à bord et les conditions des blessés, s'il y en a.
10. Donnez la condition de navigabilité actuelle de votre navire, tel que le degré de l'urgence par rapport une inondation, et une incendie.
11. Donnez une brève description de votre navire en donnant le nom du bateau (par exemple, "Blue Duck est un yacht de croisière de 32 pieds, avec une coque blanche et un rouffle bleu.).
12. Dites : "**JE VAIS ÉCOUTER SUR LE CANAL 16**".
13. Terminez le message en disant "**ICI {nom ou indicatif d'appel de votre bateau}, À VOUS**".
14. Relâchez le bouton **Push to Talk** du microphone et écoutez.

Si vous n'obtenez pas de réponse après 30 secondes, répétez l'appel en commençant à l'étape 3 ci-dessus.

ATLANTIS 150 INTRODUCTION

The Atlantis 150 is a floating, waterproof, portable 2.5-watt two-way VHF marine transceiver. It is compact, lightweight, rugged, and fits easily in your hand. This handheld VHF marine radio will give you consistent, outstanding performance in virtually all conditions and situations.

To ensure that you get the most from the Atlantis 150 features, please read this operating guide carefully before using the unit.

FEATURES

- US, Canadian, and International Marine Channels
- Built-in Precision Matched Antenna
- Floating / Waterproof to JIS8
- Key Beep
- Emergency CH16/ CH9 Mode
- 9 Weather Channel/Weather Alert
- Battery Level Display
(Battery Low Alert sounds every 5 seconds at Level 1)
- Battery Save
- Memory Scan
- Triple Watch
- TX Power Select
- Channel Select
- Volume Select
- 4-Level Digital Squelch
- Keypad Lock On / Off

*Protected against the effects of continuous immersion in water. The Atlantis 150 can withstand immersion in water up to 5 feet depth for 1 hour.

 **Note: This is not suitable for scuba diving.**

The Atlantis 150 will float when the battery cover is securely fastened.

GETTING STARTED

WHAT'S INCLUDED

Atlantis 150 Radio

Charging Cradle

AC Adapter

NiMH Battery Pack

Beltclip

Owner's Manual
(Not Shown)

NOTE

If any of these items are missing or damaged, contact Uniden Customer Service (see back cover for contact information). For information on available accessories, visit www.uniden.com.

CONTROLS AND INDICATORS

No.	Description	No.	Description
1	Antenna	9	Volume Up/Down
2	PTT (Push-To-Talk) button	10	16/9 TRI (Triple Watch) button
3	Power Boost button	11	SQL/UIC (Squelch) button
4	HI-LO/LOCK button	12	Microphone
5	Channel Up/Down	13	Speaker
6	SCAN/MEM (Memory) button	14	Channel/Volume/Squelch Indicator
7	WX/ALERT	15	Scan Indicator
8	Power Key	16	TX Indicator

No.	Description	No.	Description
17	TX LO/Hi Power Indicator	24	Battery Level icon
18	Triple Watch Indicator	25	US Channel Mode
19	WX Indicator	26	WX Alert mode indicator
20	"A" Channel Indicator	27	Charging Cradle
21	Memory Indicator	28	Charging Contacts
22	Keylock Indicator	29	Charging Indicator
23	Canada Channel Mode		

CONNECTING POWER

The charging cradle uses a single AC adapter.

1. Connect the AC adapter to the DC 9V jack on the rear of the charging cradle.
2. Plug the other end of the AC adaptor into a 120 VAC wall outlet.

NOTE

- The drop-in charger is not waterproof. Ensure the radio is dry before connecting to the charger.
- Don't use the charger when the ambient temperature is below 32°F (0°C) or above 113°F (45°C).

INSTALL THE BATTERY PACK

Your radio uses the supplied NiMH battery pack. To install the NiMH battery:

1. Make sure the radio is off.
2. Use a screwdriver to turn the battery compartment screw counterclockwise and then lift up and remove the battery cover.
3. Put the NiMH battery pack in the battery compartment, applying the battery contacts to the lower charge contacts. Be sure to follow the instructions written on the battery pack's label. Installing the battery pack incorrectly will prevent the unit from operating.

CAUTION

Use only the supplied NiMH battery pack. Do not charge alkaline or non rechargeable batteries.

5. Before placing the battery cover back on the radio, check the rubber seal around the battery compartment and the ribbon of the battery pack. Make sure that the seal is in good condition and that there is no foreign matter under the seal.

If the rubber seal appears worn, nicked, or dried out, replace it. Visit the website on the cover of this manual to order a replacement seal.

6. Replace the battery compartment door. Tighten the screws securely.

CHARGING THE BATTERY PACK

Your radio includes a charging cradle and a rechargeable battery pack. Follow these instructions to recharge the radio in the charging cradle.

NOTE

For the initial battery charge, make sure the radio is off for optimum charging.

1. Connect the charging cradle to power. Refer to page 9.
2. Set the charging cradle on the desk or tabletop, and place the radio in the charging cradle with the keypad facing forward.
3. Make sure that the LED illuminates. Charge the radio for 13 hours then remove it from the charging cradle.

WARNING

- The charging cradle is not waterproof. If the charging cradle falls into water, unplug it before attempting to remove it from the water. Allow the cradle to dry completely before reconnecting the power.
- If your radio is soiled or wet, wipe off dirt or shake water from your radio before placing it in the charging cradle.

Battery Level Display

The battery icon at the bottom of the screen indicates the battery level (displayed as one of the 4 levels below) at all times.

Battery Level	Icon	Battery Level	Icon
LEVEL 4 Battery 100% full		LEVEL 3 Battery approx. 40% capacity	
LEVEL 2 Low Battery		LEVEL 1 (flashing) Empty Battery (Battery Low Alert sounds every 5 seconds.)	

NOTE

When the **PTT** button is pressed at Level 1, an error tone sounds and transmission is disabled. Once at Level 1, the unit will shutdown automatically after 60 seconds.

NOTE

Recharge the battery at any time. From empty, the battery requires 13 hours to fully charge. For faster charging, turn off the radio.

Battery Life: 10 Hours (Typical)

ATTACHING THE BELTCLIP

To attach the belt clip:

Slide the belt clip until it snaps into place.

To remove the belt clip:

Press and hold the belt clip lock down while simultaneously sliding it upward until it releases.

OPERATION

In order to get the most out of your new radio, read this owner's manual completely before attempting to operate the unit.

BASICS

Power On/Off

1. Press and hold  to turn the radio ON. A channel number and battery level should appear on the display.
2. Press and hold  to turn the radio OFF.

Volume

The volume level can be adjusted from  (no volume) to **15** (maximum volume).

Press **VO ▲** or **VO ▼** to increase or decrease the volume level. The current volume level flashes.

Select a Channel

Press **CH ▲** or **CH ▼** to scroll through the channels individually. Press and hold **CH ▲** or **CH ▼** to scroll rapidly through the channel numbers. Refer to page 25 for a list of available channels and their corresponding frequencies and usage guidelines.

Set Squelch

Use squelch to eliminate any annoying background noise when there are no signals present.

Make sure to first select a channel not in use before setting the squelch.

Think of the squelch control as a gate. If you increase the squelch level to maximum, it raises the “Squelch Gate” so only the strongest signals get through.

If you decrease the squelch level to minimum, it lowers the “Squelch Gate” to the extent that weak signals can get through.

If unwanted weak and noisy signals are getting through, increase the squelch level (raise the “Squelch Gate”) to a medium level. Now only medium and strong signals get through.

S1 - minimum squelch

S2 - medium squelch

S3 - maximum/tight squelch

1. Press **SQL/UIC**. SQL displays and the current squelch level flashes.
2. Press **SQL/UIC** while the squelch level displays **in-order** to change the squelch level to the next step (0 - 3, then repeating again from 0).
3. Press and hold **SQL/UIC** to **save-and** exit the squelch setting. A 2 second timeout also exits squelch setting.

TRANSMITTING AND RECEIVING

Selecting Channel Modes

The radio uses U.S., Canadian, and International Marine Channels (modes). Press and hold **SQL/UIC** to change modes. Each time you press and hold **SQL/UIC**, the mode indicator changes (*US* - United States; *CAN* - Canada; *none* - International). Refer to page 25 for a list of the available channels and corresponding frequencies.

NOTE

Each time you change the UIC mode, Triple Watch, EMG CH16/CH9CH, WX mode, and WX Alert mode are canceled. The system does not remember these settings between modes. Memory channels are saved to their specific UIC mode.

Transmitting

The radio can transmit for up to 3 minutes. *TX* displays when transmitting. After 3 minutes of continuous transmission, transmission is canceled and an error tone sounds.

The radio transmits at 0.7W and 2.5W.

Boosting Transmission Power

1. Hold the radio approximately 2 inches in front of your mouth with the antenna at approximately 45° angle away from your head.
2. Press **BOOST on the side of the radio** to change the transmit power from Low

(0.7 W) to High (2.5 W). *HI* displays when on high power and *LO* displays when on low power. Speak in a clear, normal, conversational voice.

3. When you have finished speaking, release **PTT** or **BOOST** to listen for a response. *TX* then disappears.
4. When the channel is clear, press and hold **PTT** or **BOOST** to transmit. *TX* displays.

NOTE

When you press **BOOST** and the transmit power is low (LO - 0.7W), the radio transmits at maximum high power (HI - 2.5W) except for channels 75 and 76.

Receiving

Release **PTT** or **BOOST** to receive another party's transmissions to you.

HOW IT WORKS

Your radio has three main operation modes: normal, scan, and weather.

Mode	What it does	Use it when you want to...	To turn it on/off
Normal	Monitors a single marine channel and lets you talk on that channel.	Monitor a channel or talk to another radio.	(default mode)
Scan	Monitors all the channels you save into memory.	Check a small group of regularly-used channels for traffic.	Press SCAN/MEM .
Weather	Monitors the selected NOAA weather channel.	Hear the current or forecasted weather.	Press WX/ALERT .

In addition to the three operation modes, your radio provides two different watch modes which you can activate during any operation mode. In the watch modes, the radio briefly checks for activity on a specific channel, then returns to its previous operation.

Watch mode	What it does	To turn it on/off
Weather Alert Watch	Checks the last-used weather channel for hazard alerts every 7 seconds.	Press and hold WX ALERT for 2 seconds.
Triple Watch	Checks channels 16 and 9 for activity every 2 seconds.	Press and hold 16/9-Tri for 2 seconds.

 **Note:** Private boats must monitor channel 16 whenever they are underway. Water-going vessels should have Triple Watch on at all times.

NORMAL MODE OPERATION

- To transmit, remove the radio from the charger, then press and hold the **Push to Talk** key. Release the key when you are finished talking.

- For the best sound quality, hold the microphone about two inches from your mouth while you're talking.
- Press the **CH ▲** key to move up one channel at a time. Press and hold the key to scroll quickly up the channels.
- Press the **CH ▼** key to move down one channel at a time. Press and hold the key to scroll quickly down the channels.
- To change the transmit power, press the **HI-LO/LOCK** key. The transmit power switches to the next transmit power each time you press this key.

Normal mode with Weather Alert Watch

If you activate Weather Alert Watch while operating in normal mode, the radio checks the most recently used weather channel every seven seconds. If it detects a weather or other hazard alert, it will switch to that weather channel. (If you are actively transmitting, the radio waits until you finish your transmission before checking the weather channel.)

Monitoring Channel 25

Every few seconds, the radio checks the last-used weather channel.

**WX Alert
Watch on**

Normal mode with Triple Watch

If you activate Triple Watch while operating in normal mode, the radio checks channels 9 and 16 every two seconds. The radio will not check channels 9 or 16 while you are actively transmitting; it waits until your transmission is finished and then checks the channels.

SCAN MODE OPERATION

You can save channels into memory and then use scan mode to monitor those channels from lowest to highest. If the radio detects a signal on a channel, it stays on that channel as long as the signal is received; when the signal stops, the radio continues scanning.

When it detects a signal, the radio stays on the channel until you press the **SCAN/MEM** button or the signal stops.

Using the radio in scan mode

- To activate scan mode, press **SCAN/MEM**.
- You must have at least two channels in memory to start a scan.
- To save a channel into memory, select the channel, then press and hold the **SCAN/MEM** key. The **MEM** icon displays whenever you tune to that channel.

- To remove a channel from memory, set the radio to that channel, then press and hold the **SCAN/MEM** key. The **MEM** icon no longer displays.
- When the radio stays on a channel, press **CH ▲** or **CH ▼** to leave that channel and resume scanning.
- To end the scan, press the **SCAN/MEM** key again; the radio remains on the last scanned channel.

Scan mode with Weather Alert Watch

If you activate Weather Alert Watch while in scan mode (press and hold **WX/ALERT**), the radio checks the most recently-used weather channel every seven seconds, then continues scanning the next channel in memory:

Scan mode with Triple Watch

If you activate Triple Watch (press and hold **16/9/TRI**) while operating in scan mode, the radio checks channels 9 and 16 every two seconds, then goes on to scan the next channel:

WEATHER MODE

The NOAA weather channels now cooperate with the FCC to alert you of other hazards besides weather (child abduction alerts, nuclear, biological, etc.). In weather mode, the radio monitors one of the nine NOAA weather channels. If any type of alert is received, the radio sounds an alert tone and the display blinks.

Using the radio in weather mode

- You cannot transmit while in weather mode.
- To enter weather mode, press the **WX/ALERT** key.
- To turn off the radio's alert tone, press any key.
- To cancel weather mode and return to the previous marine channel, press the **WX/ALERT** key again.

Weather mode with Weather Alert Watch

Because weather mode already monitors the weather channels, you don't need Weather Alert Watch to check the weather channel every seven seconds. If you activate Weather Alert Watch while operating in weather mode, it operates as a type of "sleep" mode; the radio stays on the weather channel and mutes the speaker. If an alert is detected, the radio sounds an alert tone and turns the speaker back on. This mode is very useful when you are anchoring for the night but want to keep informed of hazards.

Weather mode with Triple Watch

If you activate Triple Watch while operating in weather mode, the radio checks channels 9 and 16 every two seconds.

Emergency Channel 16/9

While monitoring a channel (CH 20 in this example), press **16/9** to monitor CH 16.

Press **16/9** again to monitor CH 9.

Press **16/9** again to monitor the original channel (CH 20).

Triple Watch

Triple Watch mode monitors channels 16 and 9 for a signal while you listen to the currently-selected channel. The marine radio checks channel 16 and 9 for activity every 2 seconds.

1. Press and hold **16/9/TRI** to activate Triple Watch. **TRI** displays.
2. Press and hold **16/9/TRI** again to exit Triple Watch. **TRI** disappears.

NOTE

While in Triple Watch mode, you can change the currently selected channel using **CH ▲** or **CH ▼**.

DROP-OUT DELAY

While scanning, the radio stops on channels when it receives a signal. When the received signal is over, there is a drop-out delay of 2 seconds for the return of the signal. After 2 seconds, if the signal does not return, the radio resumes scanning.

BATTERY SAVE

This feature extends the battery life by switching the receiver circuit power on and off. Battery Save automatically activates during standby mode (RX mode without signal).

BACKLIGHTING

The Liquid Crystal Display (LCD) is backlit for easy viewing at night or in low light situations. Backlighting automatically switches on every time a key is pressed (except **PTT** and **BOOST**) and off 10 seconds after the last key is pressed.

KEYPAD LOCK

To prevent accidental entries, you can lock the keypad. Press and hold **HI-LO/LOCK** until it beeps to activate Keypad Lock. **LOCK** displays on the LCD. When Keypad Lock is active, a warning beep sounds and **LOCK** blinks if you try to press any keys other than **PTT**, **BOOST**, or power.

The radio retains Keypad Lock status even when you cycle power on/off. To unlock the keypad, press and hold **LOCK** again. **LOCK** disappears.

KEY BEEP

Key Beep is the tone that sounds when you press a key. To turn Key Beep on or off, press and hold the **CH ▲** or **CH ▼** key while turning the radio on.

When Key Beep is on, all key beeps are enabled. When Key Beep is off, all key beeps are disabled except WX Alert Tone.

MAINTENANCE & TROUBLESHOOTING

Due to its rugged design, your radio requires very little maintenance. However, it is a precision electronic instrument, so you should follow a few precautions:

- If the antenna has been damaged, do not transmit except in an emergency situation. Transmitting with a defective antenna may cause further radio damage.
- You are responsible for continued FCC technical compliance of your radio.
- You should arrange for periodic performance checks with your Uniden dealer.

COMMON QUESTIONS

Problem	Things to Try
The radio won't turn on.	Charge the radio.

Problem	Things to Try
The power LED on the charger doesn't turn on.	• Don't use the charger when the ambient temperature is below 32°F (0°C) or above 113°F (45°C). • Make sure the charging contacts on the radio and charger are clean. • Replace the battery.
The radio won't transmit.	• Make sure you are not in Scan mode. • Make sure you are not trying to transmit on a receive-only channel (see the channel lists starting on page E-25). • Check the battery power level; if it's low, charge the battery before trying to transmit. • Make sure the duration of each transmission is less than 3 minutes.
I can't hear anything from the speaker.	Adjust the squelch level; it is probably too high.
Noise comes out of the speaker all the time	Adjust the squelch level; it is probably too low.
I can transmit, but no one can hear me.	Check your UIC channel settings: does the area you are in use different channel assignments?
Where can I find my radio's serial number?	The serial number is on a plate inside the battery compartment.

SPECIFICATIONS

General	
Channels	All US, International, and Canada marine channels
Frequency Control	PLL
Frequency Tolerance	Transmit: 0.5 PPM (at 25°C)
Operating Temperature	-4°F (-20°C) to +122°F (+50°C)
Antenna	Flexible Whip
Microphone	Built-in Electret type
Display	Liquid Crystal Display

Speaker	16 Ω 0.2 W
Power Source	Rechargeable NiMH Battery Pack 4.8 V 700 mAh
Size (without antenna)	8.98 (H) x 2.52 (W) x 1.54 (D) inch 228 (H) x 64 (W) x 39 (D) mm
Weight	8.53 oz (242g) (w/battery)
Transmitter	
Frequency Range	156.050 ~ 157.425 MHz
Frequency Stability	$\pm$ 5 PPM
Power Output	0.7 W and 2.5 W
Spurious Emissions	-34 dBm on Hi; -40 dBm on Lo
Current Drain	1000 mA (2.5 W)
Receiver	
Type	Direct Conversion Super Heterodyne Phase Locked Loop system for Local Oscillator
Frequency Range	156.05 - 162.55 MHz
Sensitivity	0.28 μ V for 12 dB SINAD
Squelch Sensitivity	Threshold 0.22 μ V
Audio Frequency Response	+5.5 dB @ 500 Hz; -6.5 dB @ 2000 Hz
Adjacent Channel Selectivity	60 dB @ $\pm$ 25 kHz
Audio Output Power	0.13 W @10% THD
Current Drain	Squelched: 60 mA; Max. Audio: 150 mA

REGULATIONS AND SAFETY WARNINGS

WARNING! Read this information before using the radio.

RBRC Information

As part of our commitment to protect the environment and conserve natural resources, Uniden voluntarily participates in an RBRC® industry program to collect and recycle used Ni-MH batteries within the US.

Please call 1-800-8-BATTERY for information on Ni-MH battery recycling in your area. (RBRC® is a registered trademark of the Rechargeable Battery Recycling Corporation.)

MARITIME RADIO SERVICES OPERATION

Warning! This transmitter will operate on channels/frequencies that have restricted use in the United States. The channel assignments include frequencies assigned for exclusive use of the U.S. Coast Guard, use in Canada, and use in international waters. Operation on these frequencies without proper authorization is strictly forbidden. See page 25 for tables of the available channels and their uses. If you are still not certain which channels to use, see the FCC maritime radio page at the FCC website (<http://wireless.fcc.gov/marine/>) or contact the FCC Call Center at 1-888-CALL-FCC. For individuals requiring a license, such as commercial users, you should obtain a license application from your nearest FCC field office (for US users) or Industry Canada (for Canadian users).

BASIC RADIO GUIDELINES

You should familiarize yourself with the rules on marine radios and be aware of which rules apply to your boat. Complete guidelines for all ship and marine radio types can be found at the US Coast Guard website under the topic Radio Info for Boaters (the direct link is:

<http://www.navcen.uscg.gov/marcomms/boater.htm>). Here are a few guidelines that affect nearly all boaters:

- If you have a VHF radio on your boat, you must maintain a watch on channel 16 (156.800 MHz) whenever the radio is not being used to communicate. Starting in 2004, if a radio is carried, it must be on and set to channel 16 whenever your boat is underway.
- If you hear a distress call, wait a few minutes to let a shore station or Coast Guard vessel respond. If no other station has responded after 5 minutes, you must respond to the distress call.
- Do not make false mayday or distress calls as a prank or to test your radio. (This is essentially like making a false 9-1-1 call; you may be subject to fines.)

FCC/IC Information

- Certification: FCC Part 15 or I.C. RSS
- Output Power: 2.5W
- Emission: 16K0F3E
- Transmitter Frequency Range: 156.025-157.425 MHz

This device complies with Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Unauthorized changes or modifications to this equipment may void compliance with I.C. Rules. Any change or modification must be approved in writing by Uniden.

Changes or modifications not approved by Uniden could void the user's authority to operate the equipment.

L'appareil est conforme aux normes d'Industrie Canada. Son fonctionnement est soumis aux deux conditions suivantes : (1) Ce dispositif ne doit pas causer d'interférences et (2), il doit pouvoir accepter les interférences, incluant celles pouvant nuire à son fonctionnement normal.

Tous les changements apportés à cet appareil, s'ils ne sont pas expressément approuvés par Uniden ou toute utilisation de celui-ci d'une autre manière que celle décrite dans ce guide peut annuler votre autorisation de le faire fonctionner.

FCC RF Exposure Information

In August 1996 the Federal Communications Commission (FCC) of the United States with its action in Report and Order FCC 96-326 adopted an updated safety standard for human exposure to radio frequency electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of the radio complies with the FCC guidelines and these international standards.

Never allow children to operate the radio without adult supervision and the knowledge of the following guidelines.

WARNING! It is up to the user to properly operate this radio transmitter to insure safe operation. Do not exceed 50% PTT Duty Factor. Do not use the radio with a damaged antenna. If a damaged antenna comes into contact with the skin, a minor burn may result. Please contact your local dealer for a replacement antenna.

RENSEIGNEMENTS DE LA FCC SUR L'EXPOSITION AUX FRÉQUENCES RF

AVERTISSEMENT! Au mois d'août 1996, la Commission fédérale des communications (FCC) des États-Unis, par le biais de son intervention dans le rapport et l'ordonnance 96-326 'report and order FCC 96-326', a mis à jour

les normes relatives à l'exposition humaine à l'énergie électromagnétique des fréquences radio émises par les transmetteurs autorisés par la FCC. Ces directives répondent aux normes de sécurité établies précédemment par les organismes américains et internationaux responsables de la conformité à ces normes. Le design et la fabrication de cette radio sont conformes aux directives de la FCC et à ces normes internationales.

Ce dispositif est conforme aux exigences de sécurité relatives au débit d'absorption spécifique (DAS) des radiofréquences lorsque vous respectez un régime d'utilisation de 50 % (temps de conversation).

Ne laissez jamais un enfant utiliser un appareil radio doté d'un transmetteur sans supervision adéquate.

AVERTISSEMENT! Il n'en tient qu'à l'utilisateur de faire fonctionner la radio dotée d'un transmetteur de manière sécuritaire.

N'utilisez pas la radio si l'antenne est endommagée. Si une antenne endommagée entre en contact avec la peau, une brûlure légère peut se produire.

Body-Worn Operation

This device was evaluated for body-worn operations with the supplied belt-clip accessory. (All necessary accessories are included in the package; any additional or optional accessories are not required for compliance with the guidelines.) Third party accessories (unless approved by the manufacturer) should be avoided as these might not comply with FCC RF exposure guidelines.

For hand-held operation, the radio should be held 1 inch from the user's face. The use of accessories that do not satisfy these requirements may not comply with FCC RF exposure requirements and should be avoided. For more information about RF exposure, please visit the FCC website at **www.fcc.gov**.

Fonctionnement de l'appareil, lorsque porté sur le corps. Cet appareil a été testé et s'est avéré conforme aux normes d'Industrie Canada et approuvé pour le port sur le corps à l'aide des accessoires Uniden inclus et conçus pour cet appareil. L'utilisation d'accessoires ne respectant pas les exigences d'exposition RF d'Industrie Canada doit être évitée.

Avoid exposing the battery (whether attached to the radio or not) to direct sunlight, heated cars, or temperatures below -4°F (-20°C) or above +140°F (+60°C). Exposing the chemical contained within the battery pack to temperatures above +140°F (+60°C) may cause the battery to rupture, fail, or reduce performance.

In case of exposure to the cell contents, wash the affected area thoroughly, and seek medical attention.

One Year Limited Warranty

WARRANTOR: UNIDEN AMERICA CORP. ("Uniden")

ELEMENTS OF WARRANTY: Uniden warrants, for one year, to the original retail owner, this Uniden Product to be free from defects in materials and craftsmanship with only the limitations or exclusions set out below.

WARRANTY DURATION: This warranty to the original user shall terminate and be of no further effect 12 months after the date of original retail sale. The warranty is invalid if the Product is (A) damaged or not maintained as reasonable or necessary, (B) modified, altered, or used as part of any conversion kits, subassemblies, or any configurations not sold by Uniden, (C) improperly installed, (D) serviced or repaired by someone other than an authorized Uniden service center for a defect or malfunction covered by this warranty, (E) used in any conjunction with equipment or parts or as part of any system not manufactured by Uniden, or (F) installed or programmed by anyone other than as detailed by the Operating Guide for this product.

STATEMENT OF REMEDY: In the event that the product does not conform to this warranty at any time while this warranty is in effect, warrantor will repair the defect and return it to you without charge for parts, service, or any other cost (except shipping and handling) incurred by warrantor or its representatives in connection with the performance of this warranty. THE LIMITED WARRANTY SET FORTH ABOVE IS THE SOLE AND ENTIRE WARRANTY PERTAINING TO THE PRODUCT AND IS IN LIEU OF AND EXCLUDES ALL OTHER WARRANTIES OF ANY NATURE WHATSOEVER, WHETHER EXPRESS, IMPLIED OR ARISING BY OPERATION OF LAW, INCLUDING, BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THIS WARRANTY DOES NOT COVER OR PROVIDE FOR THE REIMBURSEMENT OR PAYMENT OF INCIDENTAL OR CONSEQUENTIAL DAMAGES. Some states do not allow this exclusion or limitation of incidental or consequential damages so the above limitation or exclusion may not apply to you.

LEGAL REMEDIES: This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. This warranty is void outside the United States of America.

PROCEDURE FOR OBTAINING PERFORMANCE OF WARRANTY: If, after following the instructions in this Operating Guide you are certain that the Product is defective, pack the Product carefully (preferably in its original packaging). Include evidence of original purchase and a note describing the defect that has caused you to return it.

The Product should be shipped freight prepaid, by traceable means, or delivered, to warrantor at:

Uniden America Corporation
C/O Saddle Creek
743 Henrietta Creek, Suite 100
Roanoke, TX, 76262

(800) 297-1023, 8 a.m. to 4:30 p.m., Central, Monday through Friday
