

Solder Board-Component View 5	 A photograph of a green printed circuit board (PCB) populated with various electronic components, including integrated circuits, capacitors, and resistors. The board is irregularly shaped with several mounting holes. It is placed on a blue textured surface next to a black ruler with white markings. The ruler shows dimensions in millimeters, with the vertical scale on the left ranging from 10 to 90 mm and the horizontal scale at the bottom ranging from 10 to 100 mm.
Solder Board-Component View 6	 A photograph of the reverse side of the green PCB. It shows the solder side with various components like a large black integrated circuit, several capacitors, and a small black component labeled 'SPK1'. The 'LOCKLY' logo is printed on the board, along with technical specifications: 'CH-1', 'E334073', 'W-5440-0', '2020.10.21', and 'PC08080-PC08100 REV:A00'. The board is placed on a blue textured surface next to a black ruler with white markings. The vertical scale on the left ranges from 10 to 100 mm, and the horizontal scale at the bottom ranges from 10 to 100 mm.

Solder Board-Component View 7	 A photograph of a green printed circuit board (PCB) populated with various electronic components, including integrated circuits, capacitors, and resistors. The board is positioned on a blue textured surface. A black ruler with white markings is placed horizontally below the board, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). Another ruler is placed vertically to the left of the board, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The board has four mounting holes at the corners.
Solder Board-Component View 8	 A photograph of the same green PCB from a different perspective, showing a large black rectangular component (likely a display or sensor) mounted on the board. The board is positioned on a blue textured surface. A black ruler with white markings is placed horizontally below the board, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). Another ruler is placed vertically to the left of the board, showing measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The board has four mounting holes at the corners.

Antenna View	 A photograph of the back of a silver electronic device with its antenna cover removed. A red rectangular box highlights a black, rectangular Zwave antenna module mounted on the internal metal frame. A red line points from the label 'Zwave Antenna' to this box. To the left of the antenna, a green circular button with the word 'NO' is visible. The background is a blue textured surface.
Antenna View	 A photograph of the internal components of the device, showing the main green circuit board and a black rectangular BLE antenna module. A red rectangular box highlights the BLE antenna, with a red line pointing from the label 'BLE Antenna' to it. The antenna is labeled 'YJ-P06N-BT-V02'. Below it, a green PCB module is labeled 'LOCKLY'. The device's metal frame and various screws are also visible. The background is a blue textured surface.
