

EXHIBIT 4 - TEST SETUP PHOTOGRAPHS

Conducted Emission Test Setup*	 A photograph showing a conducted emission test setup. A spectrum analyzer is on a wooden bench on the left, connected by a red cable to a power supply unit on the floor. The power supply is connected to a power strip on the wall. A smartphone is on a wooden bench on the right.
Radiation Emission Test Setup (Below 30MHz)	 A photograph showing a radiation emission test setup. A metal frame stands on a metal floor, enclosing a white test chamber. The walls of the chamber are covered with white, square-shaped electromagnetic interference (EMI) absorbers. A yellow and black striped caution tape is on the floor.

Radiation Emission Test Setup (30MHz to 1GHz)	 A photograph of a radiation emission test chamber. The interior walls are lined with white, square-shaped electromagnetic absorbers. A white, rectangular test table is positioned in the center. To the left, a metal frame with several vertical rods is visible. The floor is concrete with yellow and black safety stripes.
Radiation Emission Test Setup (1GHz to 18GHz)	 A photograph of a radiation emission test chamber. The interior walls are lined with white, square-shaped electromagnetic absorbers. A white, rectangular test table is positioned in the center. A red, shield-shaped object is visible in the foreground, partially obscuring the view. The floor is concrete with yellow and black safety stripes.

**Radiation Emission Test
Setup (Above 18GHz)**

*** Means' only test and setup for PART 15C .**
