

INSTRUCTION MANUAL

Mini DLP Projector

● FCC Statement

FCC ID: 2AK43RD-606

This device complies with Part 15 of the FCC Rules: Operation is subject to the following two conditions:

1. This device may not cause harmful interference and
2. This device must accept any interference that is received, including any interference that may cause undesired operation.

RF exposure warning :

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment shall be installed and operated with minimum distance 20cm between the radiator & body.

This device is acting as slave and operating in the 2.4 GHz (2412 ~2462 MHZ) band. Ad Hoc function is supported but not able to operate on non-US frequencies. Do not use the device with the environment which below minimum -30 °C or maximum over 50 °C.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

While projection, please do not look the lens directly, or may hurt eyes.

*Warm tips

Do not disassemble the projector, with a risk of electric shock, also affect the normal warranty.

Please do not put any liquid or heavy stuff on the projector.

To assure the stability of heat dissipate, please open the height bracket in the bottom before starting.

●How to Charge

1. To Charge when projector is off:

When the projector is connected with the power adapter, put the switch in the OFF position, it means it is charging.

2. To charge when the projector is on:

When the projector is connected with the power adapter, put the switch in the ON position, and press the switch, the charging icon will be displayed on the upper right of the main interface, it means it is charging.

Tips:

Please charge the battery with the original power adapter;
The product is only suitable for a non high temperature environment;
When it is charging, do not block the battery cooling holes;
Please don't stab or crash the battery when it is charging;
Do not get the battery wet.

Attention: This function is only for projector with battery.

Safety Precautions for the long-term unused projector with batteries:

Keep OFF on Master switch, cut off the power completely.

Charge up battery at regular:

During the period of long-term non-use, the battery may be in over-discharge condition because of its self-discharging characteristics which will result in loss of battery performance. In order to avoid such situation, the battery should be charged regularly for 2 hours every 2 months.
