Solder Board-Component View 4	

Solder Board-Component View 5	 A photograph of a small electronic component, likely a microcontroller or sensor, mounted on a blue textured surface. The component is a small black chip with two red wires and one black wire extending from it. A white connector is visible at the end of the wires. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters. The ruler has markings from 1 to 10 mm, with the number 10 highlighted in red.
Solder Board-Component View 6	 A photograph of a multi-colored ribbon cable connected to a green printed circuit board (PCB) component. The component is a small green chip with multiple pins. A black ruler with white markings is placed horizontally below the component, showing measurements in millimeters. The ruler has markings from 1 to 10 mm, with the number 10 highlighted in red.

Solder Board-Component View 7	 A photograph showing a small green printed circuit board (PCB) component with several gold-colored solder points. A multi-colored ribbon cable is connected to the component. The component is placed on a blue textured surface next to a black ruler for scale. The ruler shows measurements in millimeters, with the component spanning approximately 4 mm.
Solder Board-Component View 8	 A photograph showing a small black PCB component with a gold-colored connector. The component is labeled "MB00RT120PY020_01.1" and "20230605". It is placed on a blue textured surface next to a black ruler for scale. The ruler shows measurements in millimeters, with the component spanning approximately 2 mm.
