- 1 Slide out USB cable from the back of the case.
- 2 Plug in the Micro USB into the case and the USB into a monitor or USB adapter in charge.

CHARGING out from CASE

- 3 The case will enter in charging mode as soon as the USB cable is plugged in (turn on when fully charged).

Use the USB output to charge any device that is in emergency mode.

WARNING

Fully dry off the nostrils before placing in changing sets. If the nostrils are dirty or wet, the tube may become dislodged. To avoid the changing case, always dry the nostrils with a sterile cloth before inserting the tube.

[illegible]

A diagram of a 3D zigzag structure, possibly representing a polymer chain or a folded surface. It consists of a series of connected rectangular and triangular faces. A label 'FRONT' with a line pointing to one of the rectangular faces is located on the right side.

Diagram illustrating the correct way to use the cable for the PS4 Move motion controllers. The top part shows the Move controllers with the cable connected to the bottom of the right controller. The bottom part shows a row of icons representing different ways to hold the cable, with the correct method being to hold it straight out from the bottom of the controller.

1 Choose one earbud that is **L** connected to your Bluetooth device. This **L** earbud will **auto-connect** your device. **Pair** the other earbud and follow the Bluetooth signals. **Set the other earbud as the **slave** unit.**

Choose the left earbud (L) to connect your device or your left hand side or left pocket.

Choose the right earbud (R) to connect your device or your right hand side or right pocket.

2 Press and hold the Power Button for 3 seconds on the inside earbuds.

Press and hold 3 sec → Blinking Blue Light → Indicator Blue ON.

Once power is ON, double press Power Button to enter waitlist into Bluetooth-Plating Mode.

Press Power Button

Pairing starts with white LEDs flashing in Bluetooth-Plating Mode.

Search for Bluetooth devices in your Bluetooth settings and connect.

Select wanted device (in this case "Audiopipe"). First network device will display "Audiopipe".

Once your waitlist is successful, a connection will be made. In this case, the first item in the list is Audiopipe. It means that the device is ready to connect to other waitlist.

Turn on either the **red standby light** or the **red Power Button** for 3 seconds.

Press **+H&T** 3 sec → **Connect to a Bluetooth device** (red light indicates Power On).

The headset will automatically connect. Both headsets will show a **blue light** after indicating successful connection.

Use any new way to use your **Art 3 headset**.

Note: Pair only one headset to the Bluetooth device. This will ensure that your device and headset will maintain a proper connection and that you are aware of connection status as the headset lights to understand the proper status. The headset will pair with the first device that you connect to. The headset will pair with the first device that you connect to.

CONNECT MAIN EARBUDD TO THE CAR EARBUDD

MAIN EARBUDD

2nd EARBUDD

HIFI 10 BLUE TOOTH

DEVICE

After earbuds are connected in car, connect with **powering lights**

Left earbud = "Main Battery"
Right earbud = "Low Battery" - New first

When battery level reaches to 10%, auto connect "Low Battery" = 10%.

FAST POWER CHARGING: To activate fast-charging capabilities, press the power button and charging.

ALTERNATE POWER OFF: Press OFF until you see a warning and holding Power allows you to search for alternate power off.

POWER ON AND CONNECT: Once you have success, connect your device, then automatically connect and pair to device for next use.
