FCC ID Labeling Statement

We, Mode Sensors AS, would like to provide an explanation for the absence of the Federal Communications Commission (FCC) identification (ID) on our product, as required by the FCC regulations. Our product is a medical device that is subject to the FCC regulations.

The reason for why the FCC ID is not included on the product itself is due to design constraints. The product's available surface size (152x30mm) and the surface material are considered unfit to accommodate the FCC ID in an appropriate and legible manner. Due to this, the FCC ID is included on the pouch label and packaging. This ensures that the FCC ID can be easily accessed by consumers.

We hope that this explanation provides a clear understanding of the situation and our commitment to compliance with FCC regulations. If you require any further information, please do not hesitate to contact us.

Your Sincerely,

Magnus Nordahl
Chief Regulatory Officer, Co-founder
Mode Sensors AS
