

# SN6BHP BT Antenna Report

Antenna model: SN6BHP-BT  
Antenna type: Monopole antenna  
Trademark: \

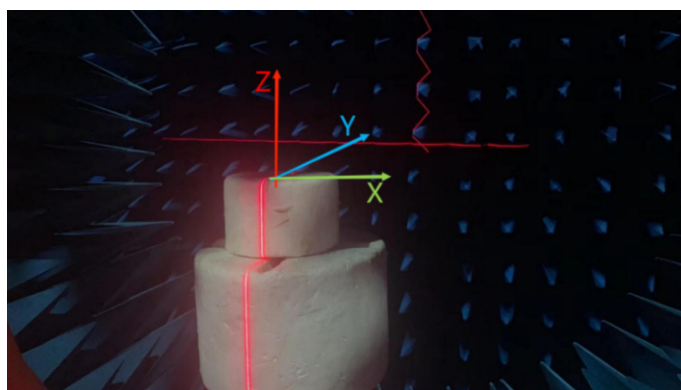

Frequency band: 2400~2500MHz  
Manufacturer information: SEI

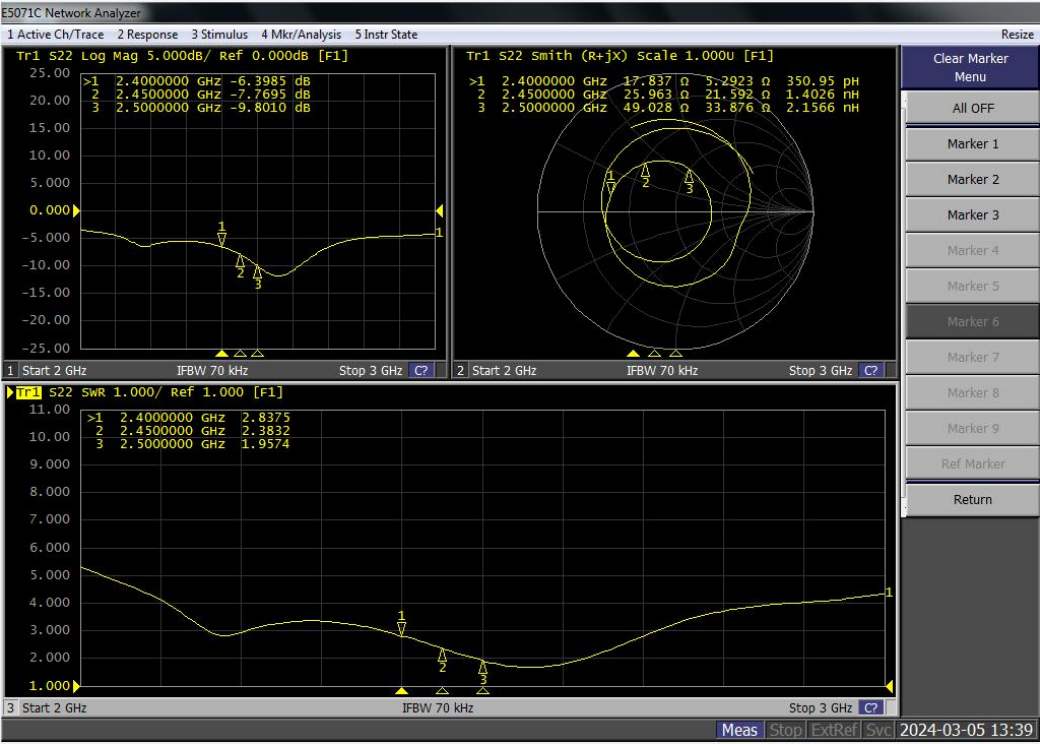

Printed Antenna BT

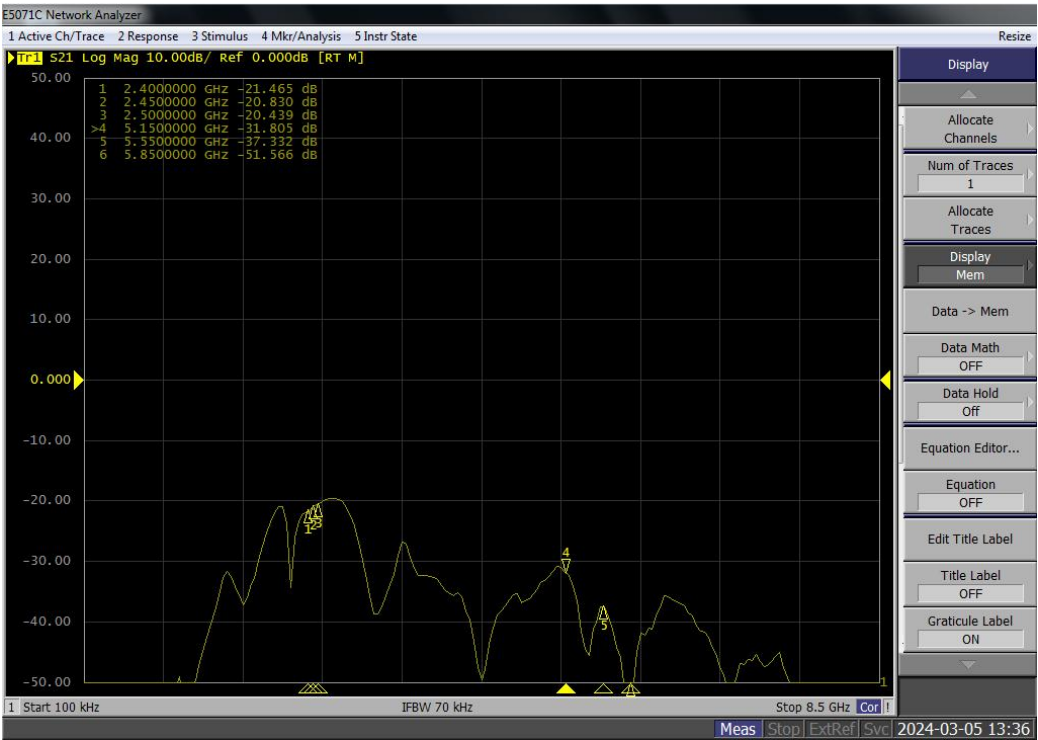

测试环境 Test environment

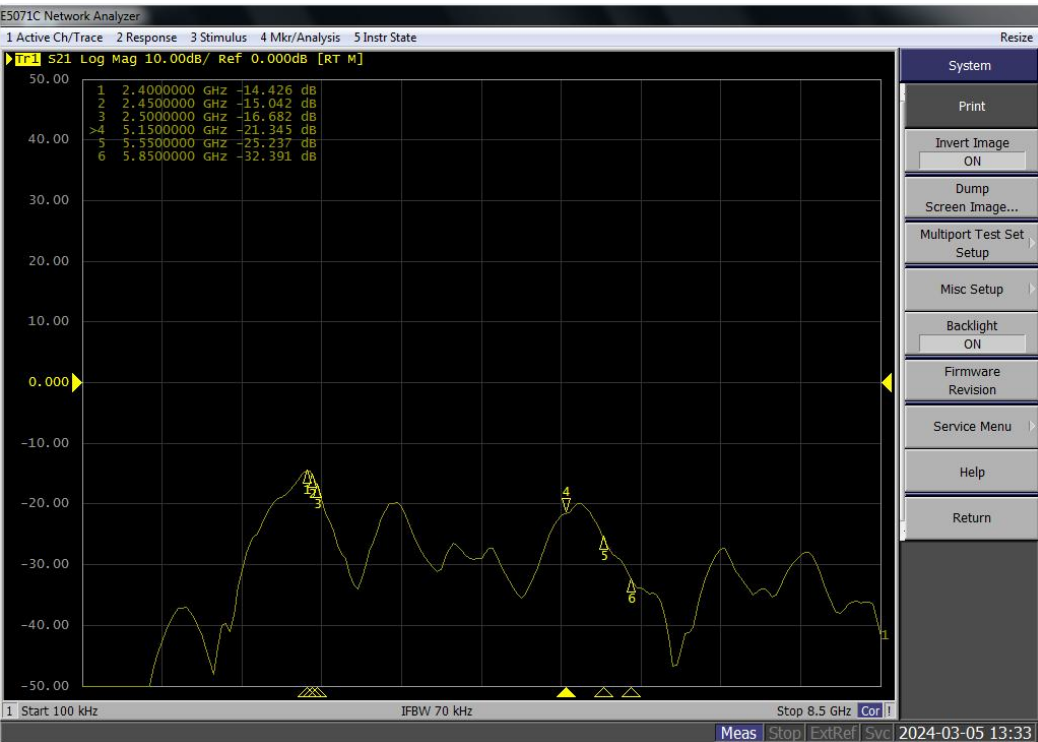

antenna standing wave ratio SWR  
BT

Isolation degree between BT and ANT1 S21

Isolation degree between BT and ANT1 S21

Passive efficiency BT

| Gain&Efficiency<br>增益、效率 |                     |                     |
|--------------------------|---------------------|---------------------|
| frequency<br>频率<br>(MHz) | gain<br>增益<br>(dBi) | efficiency<br>效率(%) |
| 2400                     | -1.8                | 38.65               |
| 2410                     | -1.72               | 38.64               |
| 2420                     | -1.59               | 39.16               |
| 2430                     | -1.3                | 40.47               |
| 2440                     | -1.02               | 42.21               |
| 2450                     | -0.72               | 43.89               |
| 2460                     | -0.4                | 46.29               |
| 2470                     | -0.24               | 47.36               |
| 2480                     | -0.2                | 47.44               |
| 2490                     | -0.19               | 47.5                |
| 2500                     | -0.2                | 45.99               |
