The letter is to reply product EW-7811Un specifications which inquired by FlightScope (Pty) Ltd.

- i The radio elements must have the radio frequency circuitry shielded. Physical components and tuning capacitor(s) may be located external to the shield, but must be on the module assembly;

ANS: No shielding. Only when radio frequency value exceeds regulatory standards requires shielding.

- ii The module must have buffered modulation/data inputs to ensure that the device will comply with Part 15 requirements with any type of input signal;

ANS: Comply

- iii The module must contain power supply regulation on the module;

ANS: Comply

- iv The module must contain a permanently attached antenna, or contain a unique antenna connector, and be marketed and operated only with specific antenna(s), per Sections 15.203, 15.204(b), 15.204(c), 15.212(a), 2.929(b);

ANS: Comply

- v The module must demonstrate compliance in a stand-alone configuration;

ANS: Comply

- vi The module must be labelled with its permanently affixed FCC ID label, or use an electronic display (See KDB Publication 784748 about labelling requirements);

ANS: FCC ID is silk printed on device.

- vii The module must comply with all specific rules applicable to the transmitter including all the conditions provided in the integration instructions by the grantee;

ANS: Comply

- viii The module must comply with RF exposure requirements

ANS: Comply
