3D ToF People Counting Sensor Featuring LoRaWAN®

Table of Contents

1.Packing List	2
2.Hardware Introduction	2
3.Installation	3
4.Power Supply	5
5.Access from Web Browser	6

3. Installation

Recommended Height

Since the detection range is 0.5m to 3m, the maximum installation height should be 3m and the minimal installation height should always be 0.5m higher than the object.

Monitored areas for people counting at different heights:

Height (m)	Monitored Area (m)
2.4	5.01 × 3.18
2.5	5.22 × 3.31
2.6	5.43 × 3.44
2.7	5.64 × 3.57
2.8	5.85 × 3.71
2.9	6.06 × 3.84
3.0	6.27 × 3.97

Installation Steps

1. Fix the two mounting ears to both side of the device with screws.

2. Drill 4 holes on the ceiling or wall according to the mounting ear's hole and fix the wall plugs into the holes, then fix the device to the wall plugs with mounting screws. When installing the device, it's suggested to fix the two screws on the top at first.

Ceiling Mount

Embedded Mount

Top-Lintel Mount at Entrance

Besides, this device can be mounted with the mounting stand via the threaded hole.

Installation Notes

- Make sure the detection part of sensor is facing straight down and in line with the ceiling.
- Avoid strong light, like direct sunlight or IR LED, in the detection area.
- Do not install the sensor close to glass or mirror.
- When the sensor is mounted on the wall, ensure the detection part of the sensor is horizontally close to the lintel of the door.

4. Power Supply

VS132 can be powered by 802.3at standard PoE or DC power adapter. Choose one of the following methods to power up the device:

Powered by DC Power Adapter

Powered by a PoE Switch

Powered by a PoE Injector

5. Access from Web Browser

VS132 sensor provides user-friendly web GUI for configuration and users can access it via Wi-Fi connection or Ethernet port. Users need to set the password when using the device for the first time. The default settings are as below:

Wi-Fi SSID: People Counter_xxxxx (can be found on the label) Wi-Fi IP: 192.168.1.1 ETH IP: 192.168.5.220 Here are 2 ways of accessing the web GUI:

- Wireless Mode: Enable the Wireless Network Connection on your computer, search for corresponding Wi-Fi SSID to connect it, then type 192.168.1.1 to access the web GUI.
- Wired Mode: Connect the device to computer via Ethernet port, assign the IP address of computer to 192.168.5.xxx manually, then type 192.168.5.220 to access the web GUI.

3D ToF People Counting Sensor Featuring LoRaWAN® VS132

VS132 is a LoRaWAN[®] 3D ToF people counting sensor designed to count the number of people entering and exiting. Applied the most advanced Time-of-Flight technology, VS132 only obtains depth maps instead of images to protect privacy and provide a high level of accuracy up to 99.5%. Cooperating with Milesight LoRaWAN[®] gateway and the Milesight IoT Cloud solution, it allows users to monitor the flow of people and trigger linkage to control other devices via browser or mobile App remotely.

With easy installation, VS132 has great use in entrances or corridors of retail stores, malls, offices, subways, etc.

Features

- Up to 99.5% accuracy basing on advanced 3D Time-of-Flight technology
- > Obtain depth map without images capturing, free from privacy concerns
- > Effective in low-light or complete darkness environments
- Bi-directional Counting
- > Able to store locally one million data records
- > DC or PoE power supply optional
- > Exquisite design for multiple installation scenarios
- > Equipped with Wi-Fi and Ethernet port for web GUI configuration
- > Acquire people counting data either from LoRaWAN[®] or Ethernet port (CGI)

- > Function well with standard LoRaWAN® gateways and network servers
- > Quick and easy management with Milesight IoT Cloud

Applications

- Offices and meeting rooms occupancy monitoring
- > Customer flow analysis on stores and shopping malls
- > Passenger flow analysis on buses or subways

Specifications

Wireless Transmission				
Protocol	LoRaWAN [®]			
Frequency	CN470/IN865/RU864/EU868/US915/AU915/KR920/AS923-1&2&3&4			
Max Tx Power	22 dBm (915 MHz)			
Sensitivity	-137 dBm @300bps			
Mode	OTAA/ABP Class C			
People Counting				
ToF FoV	92.5 ° Horizontal, 67 ° Vertical			
Detection Range	0.5 to 3m			
Installation Height	≤ 3m			
Accuracy	>99.5%			
Local Storage	1, 000, 000 data records			
Advanced Setting	Entrance and exit area customization			
Interface				
Wi-Fi	IEEE 802.11 b/g/n, 2.4GHz, only support configuration			
Ethernet Port	1 × RJ45 10/100 Mbps Ethernet Port (PoE PD), provides CGI for			
	integration			
Power Input	2-pin 5.08 mm Terminal Block			
Physical Characteris	stics			
Power Supply	1. 12 VDC, 2A by Terminal Block			
	2. 1 × 802.3 at PoE input			
Power Consumption	Typical 7.5 W, max 28 W			
Operating	-10°C ~ +60°C			
Temperature				
Storage Temperature	-20°C ~ +60°C			

Relative Humidity	0 ~ 95% (Non-condensing)
Color & Material	Black, Aluminum Alloy
Dimension	140 × 50 × 50 mm (5.51 × 1.97 × 1.97 in)
Installation	Ceiling Mounting, Wall Mounting, Embedded Mounting

Monitored Area

VS132 is engineered for bi-direction entrances or corridors. Since the detection range is 0.5m to 3m, the maximum installation height should be 3m and the minimal installation height should always be 0.5m higher than the object.

Installation Height (m)	Monitored Area (m)
2.4	5.01 × 3.18
2.5	5.22 × 3.31
2.6	5.43 × 3.44
2.7	5.64 × 3.57
2.8	5.85 × 3.71
2.9	6.06 × 3.84
3.0	6.27 × 3.97

FCC Warning:

This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

-Reorient or relocate the receiving antenna.

-Increase the separation between the equipment and receiver.

-Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

-Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
