

Attachment 2 to the test report TELRAD_FCC.16716_rev1

All these plots were taken with a limit line that at frequency 960 MHz changes from 46 dB μ V/m to 54 dB μ V/m (according to FCC 47CFR part 15 subpart B). Since restricted band starts at 960 MHz, it is clearly seen at the plots that there are no emissions beyond 960 MHz.

Zoom to Plot 7.3.26 Radiated emission measurements from 30 to 1000 MHz at the low carrier frequency

TEST SITE:	Semi anechoic chamber
TEST DISTANCE:	3 m
ANTENNA POLARIZATION:	Vertical and Horizontal
MODULATION:	PSK

Plots with FSK modulation were taken with same limit line.
