Re:

- FCC ID: G8JVRT02
- Grantee: American Meter Company

To Whom It May Concern:

Amco Automated Systems, LLC., previously known as American Meter Company, has just noticed that the grant dated 2/05/2003 states the product as being a "Remote Water Meter Transponder". We are requesting this product be approved as a "Remote Water Meter Transponder" and "Remote Gas Meter Transponder" because this unit is intended for use in both water and gas applications. There have been no changes to the product since the original certification, and when programmed for gas, the EUT's timing characteristics are not different from when programmed for water application.

Sincerely,

A handwritten signature in dark ink, appearing to read "Steve Murray". The signature is fluid and cursive, with the first name "Steve" and last name "Murray" clearly distinguishable.

Steve Murray
Mechanical Engineer
