Re:             Professional Installation of the MP9310 UHF Reader Module
FCC ID:      QRKHI469310

This letter outlines the justification for the Professional Installation of the SAMSys MP9310 UHF Reader Module by highlighting:

•              Application (or intended use) of the device

•              Installation Requirements

•              Method of marketing the device

**Intended Use of Equipment**

The intended use of this equipment is for industrial and commercial applications.  It is not intended to be used by the general public.  The market for this module is OEMs producing RFID-based (smart) labels.  The intended application consists of integrating the module into industrial bar-code/smart label printers and the specialized equipment used for the application of smart labels to cartons and pallets.  Other applications for MP9310 UHF Reader Module are conveyor systems, warehouse portals, and forklift trucks.

**Installation Requirements**

The installation requirements for the MP9310 UHF Reader Module are outlined in detail in the Users Guide.

**Method of marketing the device**

This product will not be sold to the general public.  It is available only through SAMSys or through the SAMSys network of Value Added Resellers and Systems Integrators.  These entities have been trained by SAMSys to insure that installations meet configuration and set-up requirements.

Please contact me if there is any additional information you may need.

Sincerely,

Michael Koch
Vice President of Engineering
