Dear Dan,

Subject: **C2PC Services for 100W Base Station Transceiver (762-870 MHz)**

As per Elite Quotation EEE1504462-1a please add FFSK Emission designators to the FCC Grant by Class 2 Permissive Change process for

FCC ID: CASTBA9K2 (100W Base Station Transceiver)

You will see in the FCC application form we have

- Retired our Part 22 listing,
- Defined the Part 90R and Part 90S frequency bands more accurately, and
- Removed the *F7E and *F7D emission designators.

We are claiming 9K60F2D FFSK emission designator in Part 90S (851-869 MHz) and not sure if Wide band is allowed, can you please advise on this entry.

We will pay for these services by telegraphic transfer.

I will upload the files that will be required by the FCC, to you.

Yours sincerely

A handwritten signature in dark ink, appearing to be "Des Fox", with a stylized flourish at the end.
