Federal Communications Commission  
Equipment Authorization Division  
7435 Oakland Mills Road  
Columbia, MD 21046

Dear Reviewer,

This letter is being included with application FCC ID: JVP56W10A, EA155005 (PCB portion of a composite application).

This application has been previously submitted and entered at least one technical review previously by the FCC. There were RT's issued for both the PCB and DTS portion of the applications that were practically identical. Unfortunately due to various changes of personnel handling, interpretations issues, incorrect and/or misunderstood responses, and the lab being located in Taiwan, there were many problems encountered causing the application to not be adequately addressed in a timely manner. The PCB portion was henceforth dismissed.

We have recently been tasked to ensure clear communication between the FCC and the lab and/or manufacturer as necessary. We have recently had multiple meetings and conversations in effort to get the FCC the information required from the previous RT's. We hope that you find that this information fulfills the necessary FCC requirements.

Due to time lost on the previous application and the fact it was dismissed, we trust that you can review this application at your earliest convenience. If you have any questions, please feel free to contact me directly.

Sincerely,

Timothy R. Johnson, NARTE Certified EMC Engineer (No. EMC-002205-NE)  
Examining Engineer
