

► **Fast guide**

- 1 STB      2 Fast guide      3 Power adapter
- 4 Cable HDMI

➤ **Device Information**

- ① HDMI      ② AV      ③ LAN      ④ Optician      ⑤ 12V DC
- ⑥ Restart      ⑦ USB      ⑧ Standby, on and off button      ⑨ Indicator Light

► **Connection diagram**

### home network

The Internet connection of the STB can be made by cable or Wi-Fi according to the user's preference.

➤ **Setting**

Follow the on-screen instructions using your remote control to navigate through the setup process.

► **Entertainment**

Bring your entertainment together in one place to easily switch from live and on-demand TV to major streaming apps or cast your favorites from your smartphone to your TV and do it all with your voice: search for shows, control your TV and smart devices, answer questions, manage tasks and more. Just ask Google.

- Remote control connection

After powering on, the remote control pairing interface will open automatically:

Following the diagram, you must press and hold the Back + Mute buttons on the remote control for 3 seconds, until the remote control starts blinking red, then release. At this point, the remote control will enter pairing mode and will pair with the STB.

Tip: If you don't see the pairing screen after turning on, you can press and hold the STB's Reset button for 3 seconds to display the pairing screen.

### ► Wi-Fi Connection

1. Open Settings by clicking on the gear button on the remote control.

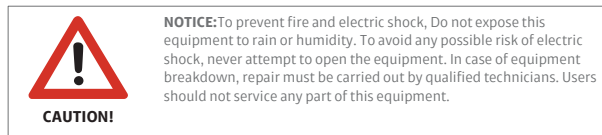

2. Open Network & Internet.
3. Find the Wi-Fi network you want to connect to and click to connect.

## ► Specifications

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

**NOTE:** This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a

➤ **Información de seguridad**

particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and the receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device and its antenna(s) must not be co-located or operating in conjunction with any other antenna or transmitter.

Radiation Exposure Statement:

To comply with FCC RF exposure guidelines, this equipment must be installed and operated at a minimum distance of 20 cm from your body.
