

## Technical Description

The EUT (Notebook) includes two transmission functions which are WLAN and Bluetooth.

### **DSSS Information:**

This device is a Notebook which operates in the 2.4GHz frequency spectrum with throughput of up to 54Mbps which OFDM technique will be applied. If the signal to noise ratio is too poor which could not support 54Mbps, the 11Mbps data rate with DSSS technique will be applied.

The transmitter of the EUT is powered by AC adapter. The antenna is PIFA antenna with UFL antenna connector.

The other instruction, please have a look at the users manual.

### **FHSS Information:**

The transmitter of the EUT (Notebook) is powered by AC Adapter. The antenna is PIFA antenna with UFL connector.

This device is a Frequency Hopping device with 79 hopping frequencies.

For more detailed instruction, please take a look at the user's manual.

Note: The bluetooth and WLAN functions can transmit simultaneously.
