

FCC Permissive Change Request

Date: 4/7/2020

To Whom It May Concern:

We are writing to request a permissive change for 2AGZM-B01017 regarding Model TAGV1.2T which is powered through a different type of battery. TagV1.2T is powered by two 3.6V Lithium batteries in parallel as opposed to a single CR2032 coin cell battery as in the other model. The voltage is regulated to 3.0V through a low dropout linear regulator (LDO) connected to the power input of the device electronics.

Thank you for your attention to this matter.

Sincerely,

A handwritten signature in blue ink, appearing to read "Elaine C. Rideout".

Elaine C. Rideout, Ph.D.
