Dear Sir/Madam

The GNSS Receiver with FCC ID: 2ACHBN6 was designed to operate in the frequency bands 400-470MHz. To aid equipment authorization in other countries which accept the United States FCC Grant for Certification, N6 is requesting that the FCC lists the frequencies 400-470MHz, under FCC Rule Part 90 on the FCC Grant.

N6 attests that the GNSS Receiver will not be marketed to USA users with the frequency band which is not allowed by the rule part 90. Per the FCC's KDB 634817 guidance, as an alternative to listing the exact frequencies, we acknowledge that it's a violation of the FCC Rules if this device operates on unauthorized frequencies.
