

EVC50 Pro Model – External Images

Scope:

This file must contain sharp, clear photographs of the system and each radio module. The photos should show all six sides and must include the exterior appearance, chassis assembly, antennas, and connectors. I/O ports should be visible, and if there is a wall bug or power brick power supply, it should be photographed as well. Any accessories such as snap-on adapters, holsters, belt clips, scan handles, and headsets also need to be photographed.
