

1 Security Slot

Your computer has a Security Slot that can be used with a standard laptop locking device, such as a Kensington Lock. You can connect the GoBook II to a large object with the lock to prevent theft of your GoBook. See the documentation that comes with your lock for more information.

Wireless Communications

The GoBook II includes two WLAN antennas for wireless communication. The two WLAN antennas are embedded in the upper display housing and requires no user action. Unauthorized antennas, modifications, or attachments could impair call quality, damage the phone, or result in violation of FCC regulations.

The GoBook II (IX260) contains the following radio transmitter:

- Cisco MPI -350 WLAN radio transmitter with two internal antennas (the internal antennas are located in the upper back side of the LCD display). The following statement is relevant when using this radio:

In order to comply with FCC RF exposure requirements, a 1.5 cm spacing should be maintained between the back of the LCD display and the user/bystander's body (except hands, feet, wrist, and ankles).
