

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View	 A photograph showing the internal components of an Electronic Under Test (EUT) housed in a black plastic casing. The casing is open, revealing a green printed circuit board (PCB) with various electronic components, including a large integrated circuit, capacitors, and connectors. A black ruler is placed horizontally below the device, showing measurements in millimeters. The background is a blue textured surface.
Solder Board-Component View 1	 A close-up photograph of the solder board-component view. It shows a small, rectangular PCB with various components, including a large integrated circuit, capacitors, and connectors. A black ruler is placed horizontally below the device, showing measurements in millimeters. The background is a blue textured surface.

Solder Board-Component View 2	 A photograph of a small, square, black printed circuit board (PCB) component. The board is populated with various electronic components, including a central integrated circuit (IC), several resistors, and capacitors. It is placed on a blue textured surface next to a black ruler with white markings. The ruler shows dimensions in millimeters, with the component positioned between the 10mm and 100mm marks.
Solder Board-Component View 3	 A photograph of a small, rectangular, black printed circuit board (PCB) component. The board features a central integrated circuit (IC) and a few other components. It is placed on a blue textured surface next to a black ruler with white markings. The ruler shows dimensions in millimeters, with the component positioned between the 10mm and 100mm marks.
