RE: FCC ID: KBCIX260-PRO-BT\_ATCB001775  
Attention: Rod Munro

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that on pages 1 and 2 of the report "Exhibit 6 Test AC Conducted IX260-PRO750BTTEST.pdf" a number of conducted emissions fail average conducted limits. Please remember that the device must pass both the QP and the average limits for conducted. Please retest or provide other data that shows compliance to conducted emissions.
2. Please note that on page 1 of the safety notes sheet for the PAN (Personal Area Network) the document states, "The WLAN transmitter should be turned off before carrying the Laptop PC order to comply with FCC RF exposure requirements". This should state the PAN transmitter should be turned off..... Please correct to reflect the proper transmitter.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
