Solder Board-Component View 2	 A photograph of a circular white PCB component with a grid of yellow LEDs and various electronic components. It is placed on a blue textured surface next to a black L-shaped ruler with white markings in millimeters. The component is positioned near the 100mm mark on the vertical ruler and the 100mm mark on the horizontal ruler.
Solder Board-Component View 3	 A photograph of the same circular white PCB component from a different angle, showing the underside. It is placed on the same blue textured surface next to the same black L-shaped ruler. The component is positioned near the 100mm mark on the vertical ruler and the 100mm mark on the horizontal ruler.

Solder Board-Component View 4	 A photograph of a small green printed circuit board (PCB) component, labeled 'View 4', resting on a blue textured surface. The component is rectangular and populated with several electronic components, including a red electrolytic capacitor, a silver cylindrical component, and several smaller surface-mount components. Three white insulated wires are soldered to the component: two are connected to the top and extend upwards, and one is connected to the side and extends to the right. A black L-shaped ruler with white millimeter markings is placed next to the component for scale. The ruler shows the component is approximately 15 mm wide and 10 mm high.
Solder Board-Component View 5	 A photograph of the same green PCB component, labeled 'View 5', showing a different side or angle. The component is rectangular and populated with electronic components. Three white insulated wires are soldered to the component: two are connected to the top and extend upwards, and one is connected to the side and extends to the left. A black L-shaped ruler with white millimeter markings is placed next to the component for scale. The ruler shows the component is approximately 15 mm wide and 10 mm high.
