

Covering letter for FCC Form 731 Attachments

0.459 Request that submitted material be withheld from Public Inspection

FCC ID OQL-P-PIN

It is requested that the following exhibits be withheld from Public Inspection:

- Operational Description
- Schematic Diagram
- Block Diagram
- Internal Photos

This information is considered to be PAC International proprietary and confidential.

The unit is supplied fully encapsulated in hard potting - the design features are not evident from inspection hence reverse engineering is extremely problematic.

This unit is believed to have a commercial advantage over our competition – revealing details of the design to our competitors would put us at a disadvantage. We therefore request that the above-listed items are withheld from public inspection.

Shaun Byrne
Principal Engineer
