3. Photographs of EUT test position

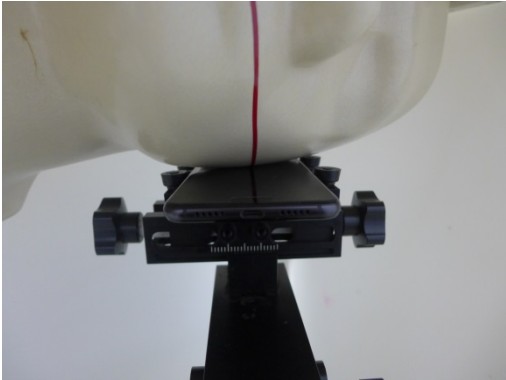

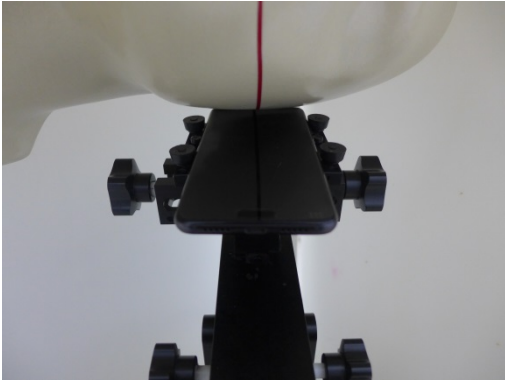

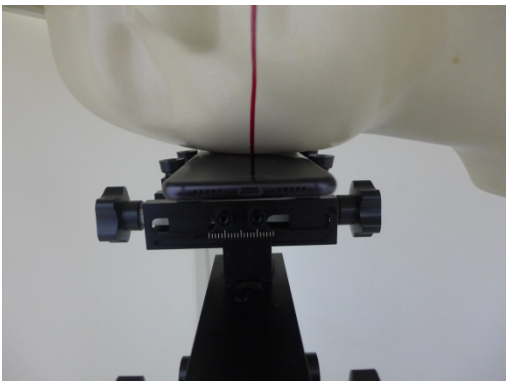

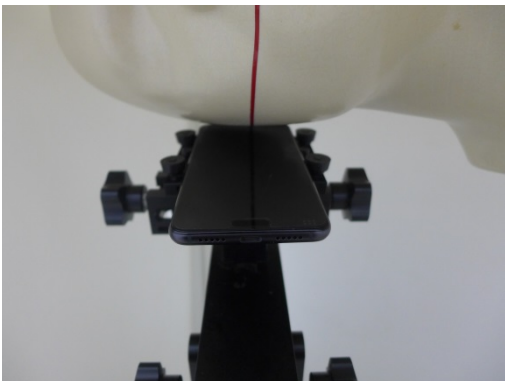

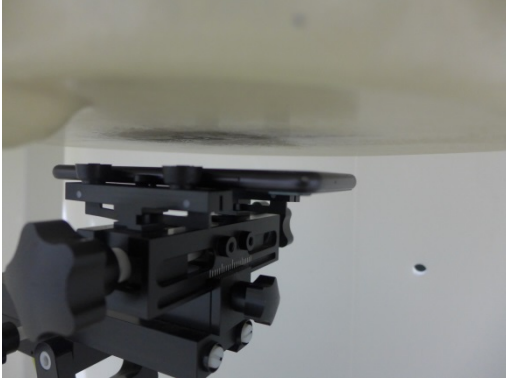

Photo 17: Left touch cheek	Photo 18: Left tilted 15 degree
 A photograph showing a white mannequin head positioned on a black adjustable stand. The head is tilted slightly to the left, and a red vertical line is visible on its forehead, likely for alignment purposes. The stand has several adjustment knobs and a central vertical post.	 A photograph showing the same white mannequin head on the black stand, but tilted more significantly to the left compared to Photo 17. The red vertical line on the forehead is still visible.
Photo 19: Right touch cheek	Photo 20: Right tilted 15 degree
 A photograph showing the white mannequin head on the black stand, tilted slightly to the right. A red vertical line is visible on the forehead.	 A photograph showing the white mannequin head on the black stand, tilted more significantly to the right compared to Photo 19. The red vertical line on the forehead is still visible.
Photo 21: Front side 15mm	Photo 22: Back side 15mm
 A close-up photograph of the black adjustable stand from a front-side perspective. The stand is positioned under the white mannequin head, which is partially visible at the top. The stand features various adjustment knobs and a central vertical post.	 A close-up photograph of the black adjustable stand from a back-side perspective. The stand is positioned under the white mannequin head, which is partially visible at the top. The stand features various adjustment knobs and a central vertical post.
