

EXHIBIT 3 - EUT INTERNAL PHOTOGRAPHS

EUT Housing and Board View 1	 A photograph showing the exterior of a white, oval-shaped electronic device (EUT) housing. The device is placed on a blue surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). A small, circular white cap is visible next to the device. The device has a green circuit board visible through a circular opening on its side.
EUT Housing and Board View 2	 A photograph showing the interior of the white, oval-shaped electronic device (EUT) housing. The device is placed on a blue surface next to a black ruler with white markings. The ruler shows measurements in millimeters (0 to 100 mm) and centimeters (0 to 10 cm). The interior shows a green circuit board with various electronic components, including a microcontroller, capacitors, and a battery. A red component is visible on the left side of the board. The white cap is visible on the right side of the housing.

Solder
Board-Component View
1

Solder Board-Component View 2	 This image shows the solder side of the PCB. Components are visible through the holes, including a large circular component (likely a battery or capacitor) and several smaller components. A ruler is placed below the board for scale, showing dimensions in millimeters.
Antenna View	 This image shows the antenna side of the PCB. A red box highlights the antenna structure, which is a small, rectangular, metallic loop. A red line points from the text "BT Antenna" to this box. A ruler is placed below the board for scale, showing dimensions in millimeters.
