

OPERATING FREQUENCY 2405MHz ~ 2475MHz
EIRP (MAX.) 0.08dBm

USER MANUAL

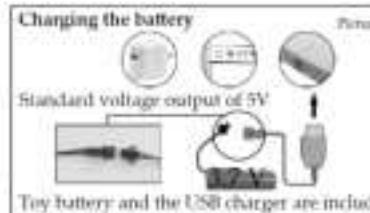

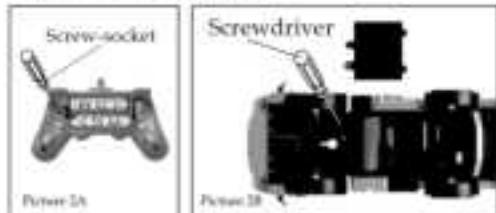

1 Introduction

Item No.: E6640-003
Materials: plastic and electronic components
Vehicle battery: 3.7V AA rechargeable battery
Remote control battery: 2 pcs of 1.5V AA batteries (not included)

2 Installing batteries

1. Remove the battery compartment door at the back of the remote control (Picture 2A). Install 2 pcs of 1.5V AA batteries in the correct polarity as indicated into the battery compartment. Reinstall the battery door and fix it with the screw (Picture 2A).
2. Remove the battery compartment door at the back of the vehicle. Install 1 pc of 3.7V AA rechargeable battery in the correct polarity as indicated into the battery compartment. Reinstall the battery door and fix it with the screw (Picture 2B).

3 2.4GHz pairing procedure

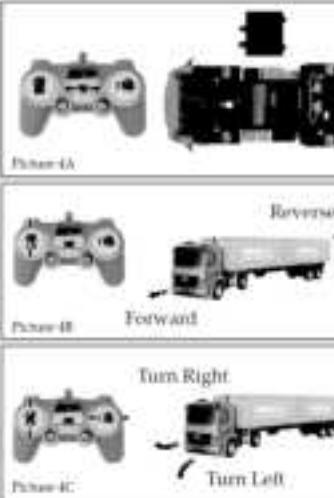

Install the batteries into the vehicle and the remote control.

Turn on the remote control and the vehicle. The pairing procedure will start automatically. The remote control indicator light will turn off and the vehicle will emit a double beep indicating that the pairing procedure was successful. (Picture 4A)

2. The remote control can be paired only with one vehicle at a time. Each set has an interference free system.
3. If there is no linking signal for 1 minute the remote control will automatically shut down.
4. To re-pair the set restart the remote control and the vehicle.

4 Operations

1. Forward / Reverse
Push left stick (throttle) forward/backward and the vehicle will go forward/backward (Picture 4B).
2. Turn Left / Right
Push right stick left/right and the vehicle will turn left/right (Picture 4C).
3. Horn button
Press the Horn/Mute button and the vehicle will emit simulated horn sound.

4. Speed Switch

Use beginner/high speed mode buttons to adjust the speed mode accordingly. (Picture 4D)

6 Recharging

Notice: Always turn off the set and remove the batteries when the vehicle is not in use and when it is being stored. The vehicle battery charging time is about 3 hours. Do not charge more than 8 hours.

7 Notice

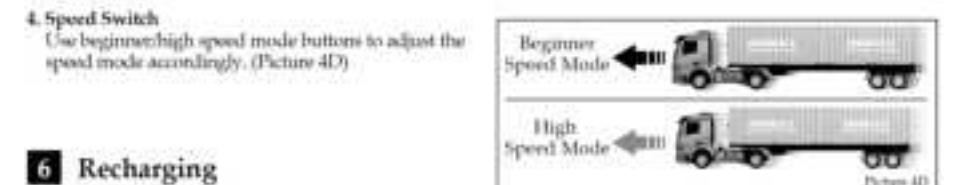

1. Do not drive on roads or areas used by real vehicles. Choose safe operating areas.
2. Do not drive in rain, snow, wetness or sand. Use dry cloth to clean the vehicle.
3. If the speed slows down or the vehicle does not properly turn right or left, please re-charge the battery.
4. The batteries should be charged under direct supervision of an adult. Please use only recommended batteries.
5. Pay attention to the battery polarity.
6. Avoid using old and new batteries together.
7. Please, charge the battery before initial use.
8. Regularly inspect the cable, plug, casing and other parts for damages. Do not use damaged batteries or charging lines.
9. Connect the battery only with the regular 5V USB charges.

CHOKING HAZARD-small parts, not for children under 3 years.
Specifications, colors and contents may vary from illustration.

Hereby, [DOUBLEEAGLE INDUSTRY (CHINA)LIMITED], declares that this [REMOTE CONTROL CAR SERIES] is in compliance with the essential requirements and other relevant provisions of Directive 2014/53/EU.

The full test of the EU declaration of conformity is available at the following internet address:

changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
