Re: Professional Installation

Dear Sir,

We, PervasID Ltd, would like to declare that the product being certified requires professional installation.

PervasID confirms the following the SpaceRanger 9200 is used to read passive UHF RFID tags and has no use the general public. PervasID sells equipment through a range of RFID specific system integrators and directly to commercial clients where we provide installation support. Where system integrators are used, PervasID provides training to ensure proper equipment installation.

The installation process requires a site survey to be carried out by a trained professional with a knowledge of cable losses and antenna patterns and the specific requirements of our system to ensure that no interference issues are caused.

If you have any questions please contact us on info@pervasid.com

Yours Sincerely

Sabeesan Sithamparathan
CEO & Director
