RE: Application for Certification of Johnson Controls Transmitter under 47 CFR 15.231.
Model/FCC ID: CB2W204HL3
Form 731 Confirmation #EA507496

To whom it may concern,

Submitted here are materials for your consideration in determining the original equipment grant for a Johnson Controls Interior, LLC, Universal Garage Door Opener product. The FCC ID for this product is CB2W204HL3. Please issue a grant without delay upon adequate evaluation of our report.

The JCI Model CB2W204HL3 is part of the Homelink ® III series. Homelink ® III devices are capable of learning garage door opener frequencies and codes from the user's original transmitter. The device is capable of learning in the range between 288MHz and 420MHz excluding forbidden frequency regions.

Johnson Controls Interiors has invested considerable resources into developing our Homelink ® products. For this reason we respectfully request that the following items be held as confidential.

- Circuit Block Diagrams
- Theory of Operation
- Schematics

The Federal Communications Commission will be notified, in writing of any changes in the software/programming of this device that could affect its RF characteristics.

Please do not hesitate to contact me with any questions you may have regarding this report. As always we look forward to your timely response.

Sincerely,

A handwritten signature in black ink, appearing to read "Jeremy P. Bos", with a stylized flourish at the end.

Jeremy P. Bos, Lead Engineer (EMC/RF), Johnson Controls Interiors, LLC.
