HDD Installation

Connection of Screen

Connect NVR to screen

1. Power on the NVR with included power adapter.
2. Connect the NVR with screen by VGA interface or HDMI interface.
3. Connect the NVR with mouse by USB interface.
4. Power on the camera device. The camera will connect to the screen automatically.

Note:

If you delete the camera from the channel and want to add it again, there are two methods:

Method 1: 1) Click **Setting > IP Camera** to enter the interface.

- 2) Click **Device Online** to search for online devices which are added before and deleted afterwards. Select the needed camera, click Add, and input user and password.

Method 2: 1) Press reset button of camera to reset.

- 2) Click the QR code in the upper right corner of the screen and scan the QR code with the camera.

Connection of App

Download

SmartLife or Tuya Smart is available for both iOS and Android OS. Search the name 'SmartLife', 'Tuya Smart' in App Store or Google Play, or scan the QR code to download the App. You can select the App according to needs.

·Support

Set up router

- * If you want to connect NVR to App, you need to connect the NVR to router with network cable first.
- * Your phone of App and NVR should be in the same network segment.
Please select suitable router before connection.
- * The router supports the 2.4GHz Wi-Fi (doesn't support the 5GHz).

Preview Function

* Connect NVR to screen in advance.

For more details, see page of "Connection of Screen".

* The NVR and cameras are paired by factory.

When they are powered on, they will connect to each other automatically.

Live View

- | | |
|---|-----------------------------------|
| 1 | Channel list of connected cameras |
| 2 | Current date and time |
| 3 | Whether to record or not |
| 4 | Wi-Fi signal strength |
| 5 | Navigation bar of selected camera |
| 6 | Navigation bar of live view |

Open live view

Click **Setting** > **System and Upgrade** to enter the interface.

1. **View system info:** You can view device information.
2. **Upgrade NVR:** Put the latest firmware into the USB device, and insert the USB to the NVR. Click the **Check Upgrade** to find the latest firmware, and follow the prompts to upgrade.

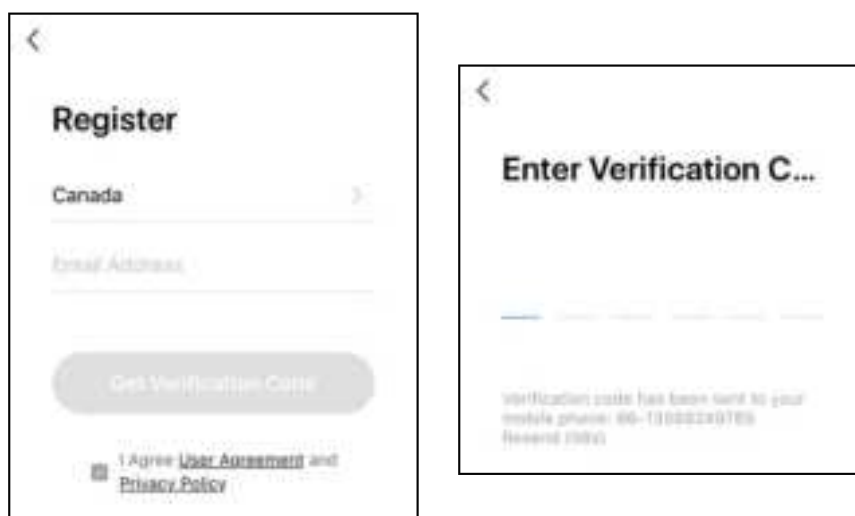

Connection of App - Registration

Registration process

Step 1 Open the Smart Life App, click "Sign Up", read the "User Agreement Privacy Policy" and click "Agree" .

Step 2 Input a legal and valid Mobile number or Email address and click "Get Verification Code". Input the verification code to log in.

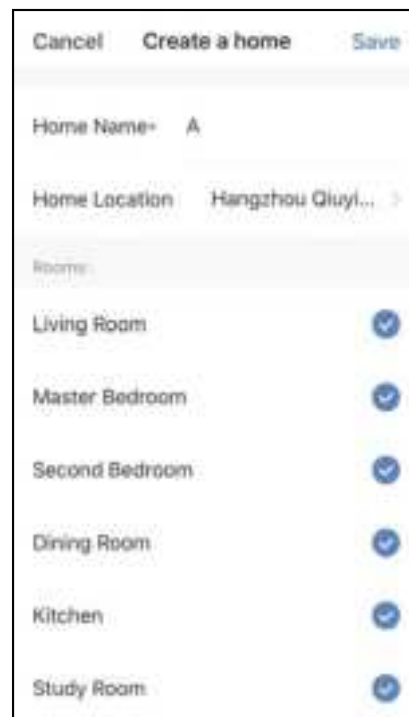

Connection of App

- 1 Set up the parameters of the router firstly and then record the SSID and password of your Wi-Fi. Make sure the Wi-Fi is stable and fluent and then connect your smartphone to the Wi-Fi.

Note:

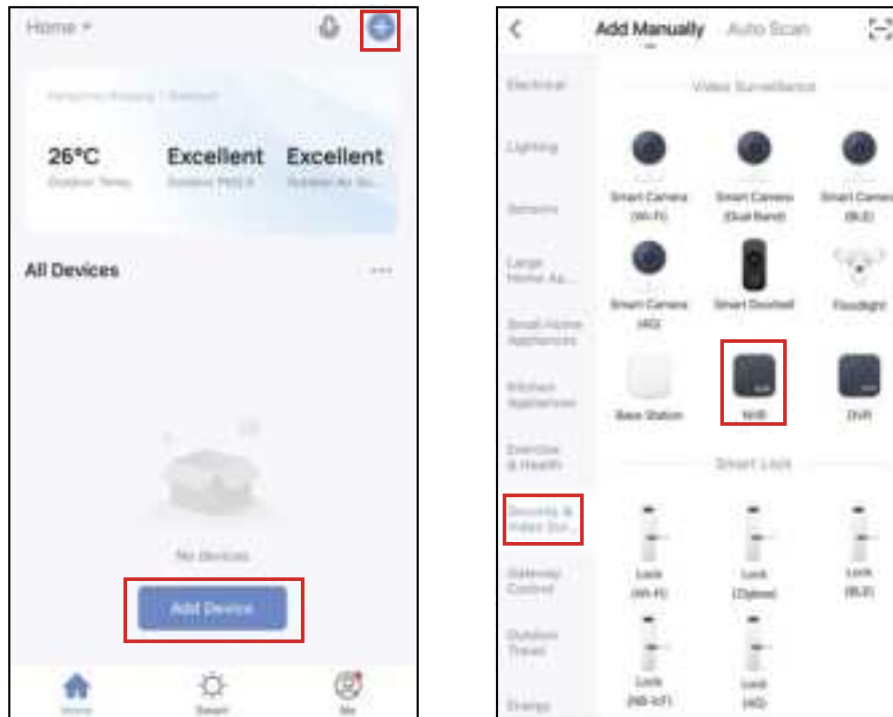

- Please consider the installation position of NVR before selecting a router or a repeater which also provides Wi-Fi for your smartphone, because the NVR have to be connected to the router or the repeater by network cable.
- NVR only supports 2.4GHz Wi-Fi network.
- The number of bits in the SSID and passwords of the router should not exceed 24 digits.

- 2 1) Take out the NVR and power on.
2) Take out the prepared network cable.
Connect the NVR to the router or repeater via the network cable.
3) Connect your phone to Wi-Fi.
* Your phone of App and NVR should be in the same network segment.
- 3 Open the Smart Life App, click "Me" >> "Home Management" >> "Create a home", and you can customize the home name and related settings.

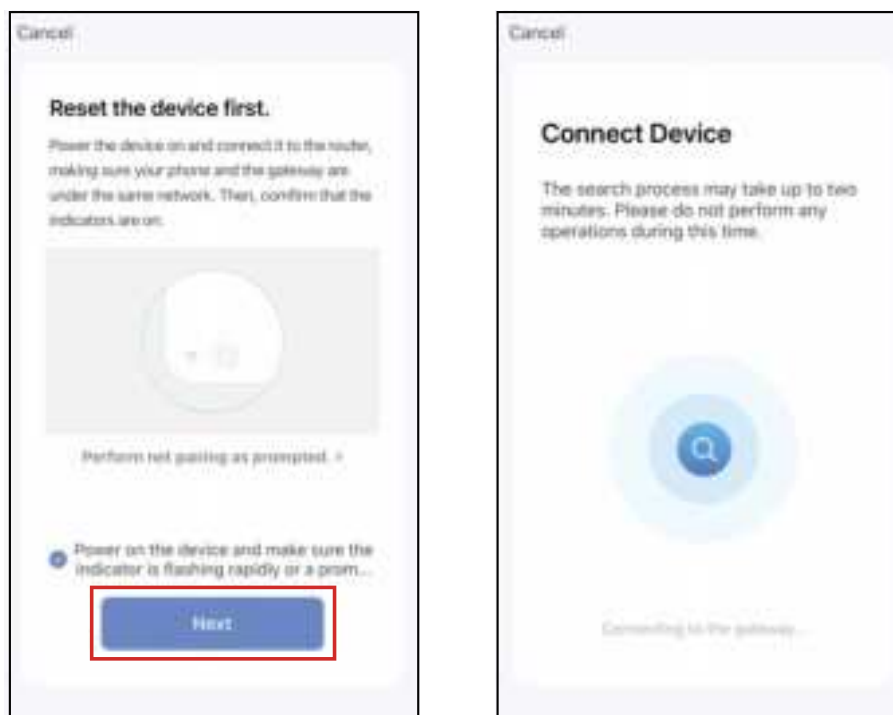

Connection of App

- 4 Click "Add Device" or "+", and then select "Security & Video Surveillance" >> "NVR" to add device.

- 5 Reset the device first.
Click "Next" and the devices on the same network segment will be auto searched.

- 4 In the device adding list, select the device you need and then tap "+".

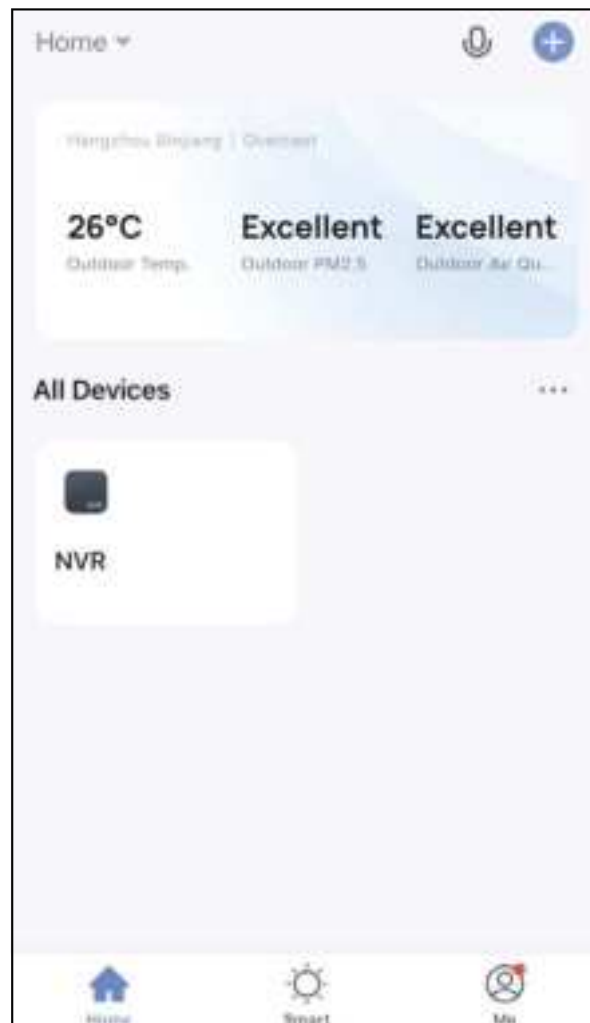

- 5 When connecting, you should make sure your router, mobile, and NVR are on the same network segment.

When camera added successfully, click "✕" you could also DIY the camera's name.

- 5 In "NVR" interface, click " ... ", and you can set up the common functions of NVR.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure Statement

This device complies with FCC radiation exposure limits set forth for an uncontrolled environment and it also complies with Part 15 of the FCC RF Rules. This equipment must be installed and operated in accordance with provided instructions and the antenna(s) used for this transmitter must be installed to provide a separation distance of at least 20 cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter. End-users and installers must be provide with antenna installation instructions and consider removing the no-collocation statement.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Caution!

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
