Re: Class II Permissive Change Application for Panasonic Single Modular Model WW22A under
FCC ID: ACJ9TGWW22A / Certified Under FCC Parts 22H, 24E, 27, 90, 96
for Installation within Panasonic Personal Computer Model FZ-G2 (mk2)

To whom it may concern:

Pursuant to CFR§ 2.1043, Panasonic Corporation of North America hereby requests a Class II Permissive Change for its application with FCC ID: ACJ9TGWW22A, which was granted by UL Verification Services Inc.

This authorization only covers the Class II permissive change application for the following changes:

- Mobile to Portable classification due to installation into Panasonic PC (Model: FZ-G2 mk2)
- Collocation with Wireless Module (Model: WL22A) with pre-existing FCC ID: ACJ9TGWL22A, whose SAR test data is included in this application.
- The Host PC (Model: FZ-G2 mk2) does not support LTE band 30 which is disabled by software at the factory and cannot be enabled by the end user.
- LTE band 42 and 48 Antenna gain value was changed higher than original application. Thereby, B42 and B48 power setting value was changed lower than original application.
- This module used in the Host PC (Model: FZ-G2 mk2) has the power reduction mode which is specially programmed and tuned to operate at a lower power setting than the original maximum power to ensure that the output power does not exceed the targets described in the SAR report.

No other radio parameters have been changed.

Thank you for your attention in this matter.

Sincerely,

Ben Botros
Manager – Regulatory and Compliance
Panasonic Corporation of North America
