

# Product Specifications

## PX3F-52-N7A

3 ft Standard Parabolic Unshielded Antenna, dual-polarized, unpressurized, 5.25–5.85 GHz, type N female flange, gray antenna with flash, standard pack—one-piece reflector

## CHARACTERISTICS

### General Specifications

Diameter, nominal	0.9 m   3 ft
Antenna Input	N Female
Antenna Type	PXF - Standard Parabolic Unshielded, Dual-Polarized Antenna, unpressurized
Polarization	Dual
Reflector Construction	One-piece reflector
Antenna Color	Gray
Radome Color	Gray
Radome Material	Molded
Flash Included	Yes

Packing \*

Standard pack

## Electrical Specifications

Operating Frequency Band *	5.250 – 5.850 GHz
Gain, Top Band	33.5 dBi
Gain, Mid Band *	33.4 dBi
Gain, Low Band	33.4 dBi
Front-to-Back Ratio *	42 dB
Cross Polarization Discrimination (XPD) *	30 dB
Beamwidth, Horizontal	3.8 °
Beamwidth, Vertical	3.8 °
VSWR *	1.50
Return Loss *	14.0 dB
Radiation Pattern Envelope Reference (RPE) *	4741
Electrical Compliance	ETSI 302 217 Class 1

## Mechanical Specifications

Net Weight	18 kg   40 lb
------------	---------------

## Packed Dimensions

Gross Weight, Packed Antenna	18.0 kg   39.7 lb
Length	115.0 cm   45.3 in
Width	87.0 cm   34.3 in
Height	115.0 cm   45.3 in

## \* Footnotes

Cross Polarization Discrimination (XPD)

The difference between the peak of the co-polarized main beam and the maximum cross-polarized signal over an angle twice the 3 dB beamwidth of the co-polarized main beam.

*Front-to-Back Ratio*

*Denotes highest radiation relative to the main beam, at  $180^\circ \pm 40^\circ$ , across the band. Production antennas do not exceed rated values by more than 2 dB unless stated otherwise.*

*Gain, Mid Band*

*For a given frequency band, gain is primarily a function of antenna size. The gain of Andrew antennas is determined by either gain by comparison or by computer integration of the measured antenna patterns.*

*Operating Frequency Band*

*Bands correspond with CCIR recommendations or common allocations used throughout the world. Other ranges can be accommodated on special order.*

*Packing*

*Andrew standard packing is suitable for export. Antennas are shipped as standard in totally recyclable cardboard or wire-bound crates (dependent on product). For your convenience, Andrew offers heavy duty export packing options.*

*Radiation Pattern Envelope Reference (RPE)*

*Radiation patterns determine an antenna's ability to discriminate against unwanted signals under conditions of radio congestion. Radiation patterns are dependent on antenna series, size, and frequency.*

*Return Loss*

*The figure that indicates the proportion of radio waves incident upon the antenna that are rejected as a ratio of those that are accepted.*

*VSWR*

*Maximum; is the guaranteed Peak Voltage-Standing-Wave-Ratio within the operating band.*
